

Shaft Power Meter / *by Kyma*

Harness your vessel thrust

Solid technology for continuous monitoring of shaft power, torque, thrust, and RPM to optimize your ship performance.

Trusted Shaft Power Measurement with **> 99.5% Accuracy**

Unlock accurate and real-time performance assessments of your vessel.

GTT Marine's Shaft Power Meter revolutionizes the way you manage your vessel's performance. By providing precise data on power transfer from the engine to the propellers, you gain the insights needed to enhance sustainability, optimize fuel efficiency, and plan maintenance more effectively. Trust in a solution that has stood the test of time, with over 6,000 units installed worldwide, including systems that have been operational for over 30 years.

Universal Compatibility

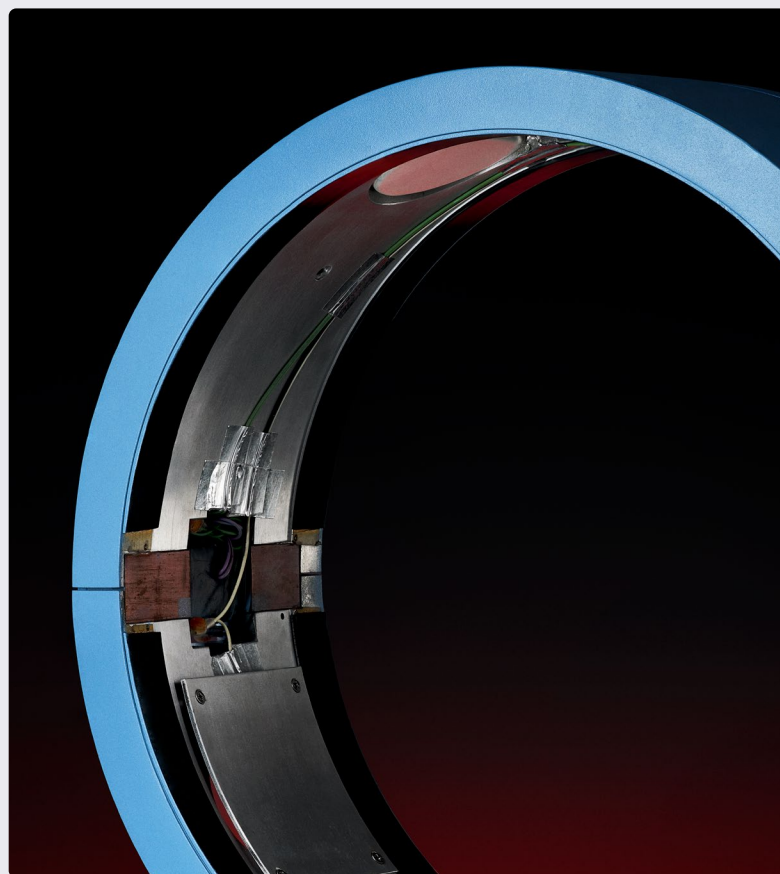

Suitable for any vessel with a propeller shaft, making it a versatile choice for diverse maritime operations.

Unique Value

- **Maintenance-Free Excellence:** No moving parts ensure a maintenance-free experience, saving you time and reducing operational costs.
- **Proven Reliability:** With a track record of over 6,000 units sold, some +30 years old and still performing flawlessly.
- **Versatile and Durable:** Engineered to withstand the harshest maritime environments, ensuring long-term durability and minimal downtime.
- **Compliance and Certification:** Fully compliant with IACS proposed SHaPoLi solution and type-approved by leading classification societies including ABS, BV, DNV, LR, and RINA.

Key Capabilities

- **Easy Calibration:** Simplify the setup process with user-friendly calibration procedures.
- **Advanced Display:** The Crew Display Unit provides real-time insights directly to the crew, facilitating immediate action.
- **Tamper-Proof Logging:** Secure and reliable data logging to ensure integrity and compliance.
- **Shore-Based Monitoring:** EEXI SHaPoLi Online enables continuous monitoring from shore, providing strategic oversight.

Certified Excellence

- China Classification Society Type Approval Certificate
- Bureau Veritas Type Approval Certificate
- DNV Type Approval Certificate
- RINA Type Approval Certificate
- ABS Product Design Assessment Certificate

Pioneering Maritime Innovation

Empowering maritime operations with trusted, innovative solutions. Our mission is to enhance your fleet's performance, efficiency, and sustainability through state-of-the-art technology and unparalleled expertise.
