

Environmental Policy

Land & Drainage Consultancy (LDC) is committed to minimising environmental impact and promoting sustainable practices across all areas of our work.

We aim to:

- Deliver environmentally responsible advice and solutions
- Promote sustainable land and drainage practices
- Reduce waste and resource consumption where possible
- Consider environmental impact in all project decisions

We continually review our practices to improve environmental performance and support a more sustainable future.

This policy provides a general framework and may be updated as our practices evolve.
