

Donor Horse Serum

General information

Horse Serum and Donor Horse Serum contain more immunoglobulins than Fetal Bovine Serum and have increased protein content. They are a cost effective alternative to Fetal Bovine Serum.

Donor Horse Serum features a controlled collection of the raw serum. In contrast to slaughtered horses, donor horse serum has a lower endotoxin content and exhibits a lower level of batch to batch variation.

Product specifications

pH	6.8 – 8.2
Osmolality	240 – 340 mOsm/kg
Endotoxin	≤20 EU/ml
Total Protein	≤8.0 g/dl
Albumin	≤4.5 g/dl
Hemoglobin	≤30 mg/dl
Mycoplasma	Not detected
Virus tested for	EIA (Equine Infectious Anaemia)
Sterility	Tested
Storage	Store at ≤-15 °C.

Features

- Alternative to Calf Serum
- Suitable for ES cell culture
- Autologous cell culture system

Precautions and disclaimer

This product is for research use only. Please consult the Material Safety Data Sheet for information regarding hazards and safe handling practices.
