

TC100 Insect Medium, with L-Glutamine

General information

Dr. Gardiner and Dr. Stockdale developed TC-100 Insect medium in the mid-1970s by modifying Grace's medium. The purpose of the modification was to enhance the production of *Autographa californica* NPV virions by cells from the fall armyworm, *Spodoptera frugiperda*. TC-100 Insect medium can support the growth of cells derived from various lepidopteran species, including Sf9, when supplemented with 10% fetal bovine serum (FBS). This medium is primarily used for the production of baculoviruses in lepidopteran cell lines.

Applications: Insect cell culture (e.g. Sf9); Production of Baculovirus

Product specifications

Appearance	Clear light yellow liquid
CO2 concentration, optimum	0.0 – 0.5 %
Storage and shelf life	Store at +2 °C to +8 °C, protected from light. Once opened store at 4 °C and use within 6-8 weeks.
Shipping conditions	Ambient
