

LymphoFirst

General information

LymphoFirst Medium is intended for use in short-term cultivation of peripheral blood lymphocytes for chromosome evaluation. The medium is based on a basal medium supplemented with L-glutamine, fetal bovine serum, antibiotics (gentamicin) and phytohemagglutinin-M (PHA-M). It is supplied as frozen medium, which is ready for use after thawing.

Product specifications

Appearance	Clear yellow to red frozen liquid
Storage and shelf life	Store at ≤ -15 °C protected from light. Do not use this product after its expiry date. Once opened, store at +2 °C to +8 °C and use within 10 days.
