Selling Guide

Coming Soon:

IMD300 Ice + Water Dispense,
Arriving mid-2026

Preferred Ice. **Smarter Performance.** **Small footprint dispensing.**

For foodservice operators and workplaces that want to offer the consumer preferred nugget ice experience in a compact footprint, our countertop dispenser delivers efficient, reliable ice production with updated electronics, eco-friendly R290 refrigerant, and future-ready connectivity—providing modern performance in a space-saving design.

- Future-proof design prevents costly conversions and keeps equipment compliant with evolving regulations
- Connected-ready for tomorrow's smart kitchen needs
- Advanced controls boost ice production efficiency and cut energy, water, and service costs for measurable ROI
- Compact footprint saves space without sacrificing ice output

Selling Guide

Nugget ice is widely loved for its chewable texture and ability to absorb flavor, making it the “**ice of choice**” across restaurants, healthcare facilities, and convenience stores. Growing consumer demand translates into operators preferring nugget ice machines to enhance customer experience and repeat business.

Future-proofing Design

R290 refrigerant - Future-proofing ensures operators won't face costly conversions or equipment obsolescence. **Connectivity-ready platforms enable future IoT features** like remote monitoring, predictive maintenance, and performance analytics. This aligns with operator trends toward connected kitchens and proactive equipment management.

Improved Efficiency and Noise Reduction

Updated electronic controls optimize ice production cycles, reduce energy consumption, and minimize water usage. **Built-in diagnostics decrease downtime and lower service costs**, giving operators a measurable ROI. New design reduces sound which matters in consumers facing lobby locations.

Consumer Ice Preference - Nugget/Chewable

Growing consumer demand translates into operators preferring nugget ice machines to **enhance customer experience and repeat business**.
