Preferred Ice. Smarter Performance. Greener Future.

For foodservice operators and beverage retailers who want to delight customers with nugget ice, our next-generation ice makers deliver superior efficiency, sustainable R290 refrigerant compliance, and future-ready connectivity. Unlike traditional units, they combine energy-saving electronics with a sleek carbon black design, creating an ice solution that is as profitable and reliable as it is visually appealing.

- Future-proof design prevents costly conversions and keeps equipment compliant with evolving regulations
- Connected-ready, IoT-prepared for tomorrow's smart kitchen needs
- Updated electronic controls optimize ice production cycles, reduce energy consumption, and minimize water usage. Built-in diagnostics decrease downtime and lower service costs, giving operators a measurable ROI.

Selling Guide

Nugget ice is widely loved for its chewable texture and ability to absorb flavor, making it the “**ice of choice**” across restaurants, healthcare facilities, and convenience stores. Growing consumer demand translates into operators preferring nugget ice machines to enhance customer experience and repeat business.

Future-proofing Design

R290 refrigerant - Future-proofing ensures operators won't face costly conversions or equipment obsolescence. **Connectivity-ready platforms enable future IoT features** like remote monitoring, predictive maintenance, and performance analytics. This aligns with operator trends toward connected kitchens and proactive equipment management.

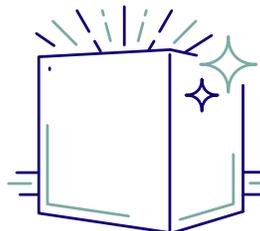

Improved Efficiency and Noise Reduction

Updated electronic controls optimize ice production cycles, reduce energy consumption, and minimize water usage. **Built-in diagnostics decrease downtime and lower service costs**, giving operators a measurable ROI. New design reduces sound which matters in consumers facing lobby locations.

Consumer Ice Preference - Nugget/Chewable

Growing consumer demand translates into operators preferring nugget ice machines to **enhance customer experience and repeat business**.

Modern Aesthetic for an Upscale Look

The sleek **carbon black front fascia** provides a modern, professional look that complements today's front-of-house and open-kitchen environments. Equipment that looks as good as it performs helps operators **align with customer expectations for clean, stylish, and premium spaces**, enhancing brand image.
