

# Sure-Fill with Soda/Water Option

## -Wiring Diagram-

- Item 1. lever
- Item 2. Sure-Fill Module
- Item 3. Module connection to lever
- Item 4. Lever switch
- Item 5. Sealing coating on switch connections

### Note:

1. Wiring harness is installed as shown in installation instructions P/N 83720-005 for complete valve or P/N 82700-005 for kit
2. Instructions for strain relief of the wires to the front cover switch are included with the cover installation instructions.
3. Operation- Push Soda or water button to fill cup. If the cup overfills and the soda or water contacts the Sure-Fill valve lever, the valve will shut-off.
4. Caution: When filling a cup with soda or water do not push against the valve lever with the cup. If the valve lever switch is accidentally closed when the soda or water push button is release, the valve will dispense beverage into the cup being filled.
