

## DRIP TRAY DRAIN KIT (P/N 326002000) FOR FCB BEVERAGE DISPENSERS

The Drip Tray Drain Hose Kit (P/N 326002000) when installed on the FCB dispenser, eliminates the need to periodically remove and empty the drip tray waste. After installation of the drip tray kit, drip tray waste is routed to a permanent drain through the drain hose connected to the drip tray.

**NOTE: Only qualified personnel should install this kit.**

Unpack and inspect the kit. Make sure all parts listed in Table 1 are present and in good condition.

Table 1

Loose-Shipped Parts			
Item No.	Part No.	Name	Qty.
1	170413000	Drain Fitting	1
2	151281000	Lock Washer, Internal Tooth	1
3	170423000	Hex Nut, 5/8-32	1
4	140133000	Drain Hose Clamp	1
5	315865000	Drain Hose, 5/8-inch	1
6	3129	Coupler, Drain Hose, 5/8-inch	1

### Installation Process

1. Remove cup rest and drip tray from the dispenser.
2. Drill a 5/8-inch diameter hole in the lowest point (center) in the bottom of the drip tray.
3. Install Drain Fitting (Item 1) in the drip tray hole and secure with Lock Washer, Internal Tooth (Item 2) and Hex Nut (Item 3).
4. Cut a 5-inch piece of hose from the Drain Hose, 5/8-inch (Item 5).
5. Install one half of the Coupler, Drain Hose (Item 6) on one end of the 5-inch piece of drain hose. Install the other half of the drain hose coupler on the 70-inch piece of drain hose.
6. Connect the 5-inch piece of drain hose to the drip tray fitting. Secure the connection with the Drain Hose Clamp (Item 4).
7. Install the drip tray on the dispenser, then install the cup rest in the drip tray.
8. Connect the drain hose coupler half to the drip tray coupler half.

**NOTE: The drip tray drain hose may be routed to a waste container, but is not recommended due to sanitation and cleaning problems. Connection of the drain hose to a permanent drain is highly recommended.**
