## INSTALLATION INSTRUCTIONS

---

To the user of this manual: This unit must be installed and serviced by qualified persons. The unit contains no user serviceable parts.

Back Room Package Part Numbers; 4260C, 4260E, 8728C, 8728E, 8747C, 8747E, 8742E, 8742C, 8743E, 8743C, 8744E, 8744C, 8745E, 8745C, 561300020C, 561300021E

Water Booster Part Numbers: 8855, 8755

**WARNING: The water booster pump motor must be Earth Grounded.**

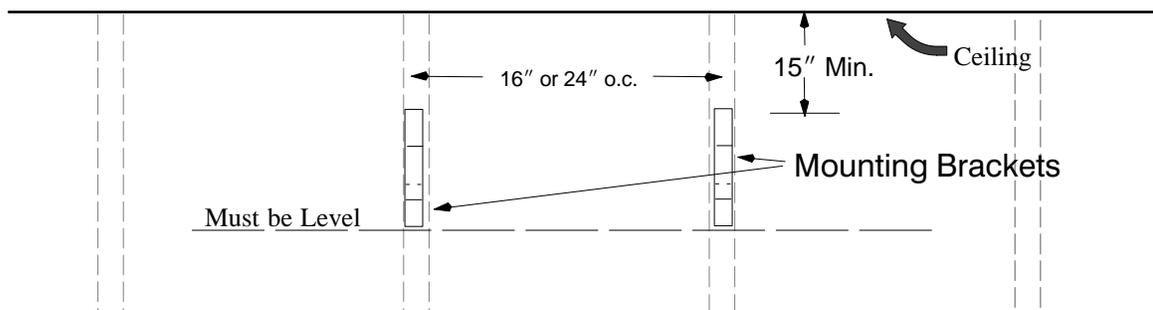

If the inlet water pressure to the back room stand is below 65 psi, then a water pressure booster should be installed to maintain constant pressure to the carbonator.

### BACK ROOM STAND INSTALLATION

The location of the stand should be as close to the dispensing area as possible. Although the restaurant management will dictate the possible locations, choose a location that allows access for changing bag-n-box syrup containers and filters. Also allow sufficient space for CO<sub>2</sub> cylinders (Two, plus spares). CO<sub>2</sub> cylinders must be secured to meet DOT regulations.

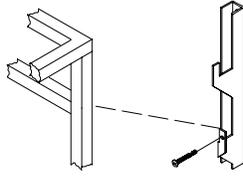

If water booster is required, the shelf attaches to wall with two brackets supplied. The brackets must be attached to wall studs with the 3" dry-wall screws provided. The width of the shelf will accommodate wall stud spacing of 16 or 24 inches on center.

#### Mounting Water Booster Brackets

## WATER PRESSURE BOOSTER PLACEMENT

After brackets are mounted on the wall as shown, the shelf can be lifted into place.

Drill a hole into the frame using the hole in the bracket as a guide. Secure shelf to the brackets. Only one screw is needed. Connect all lines as indicated in the Connection Diagram.

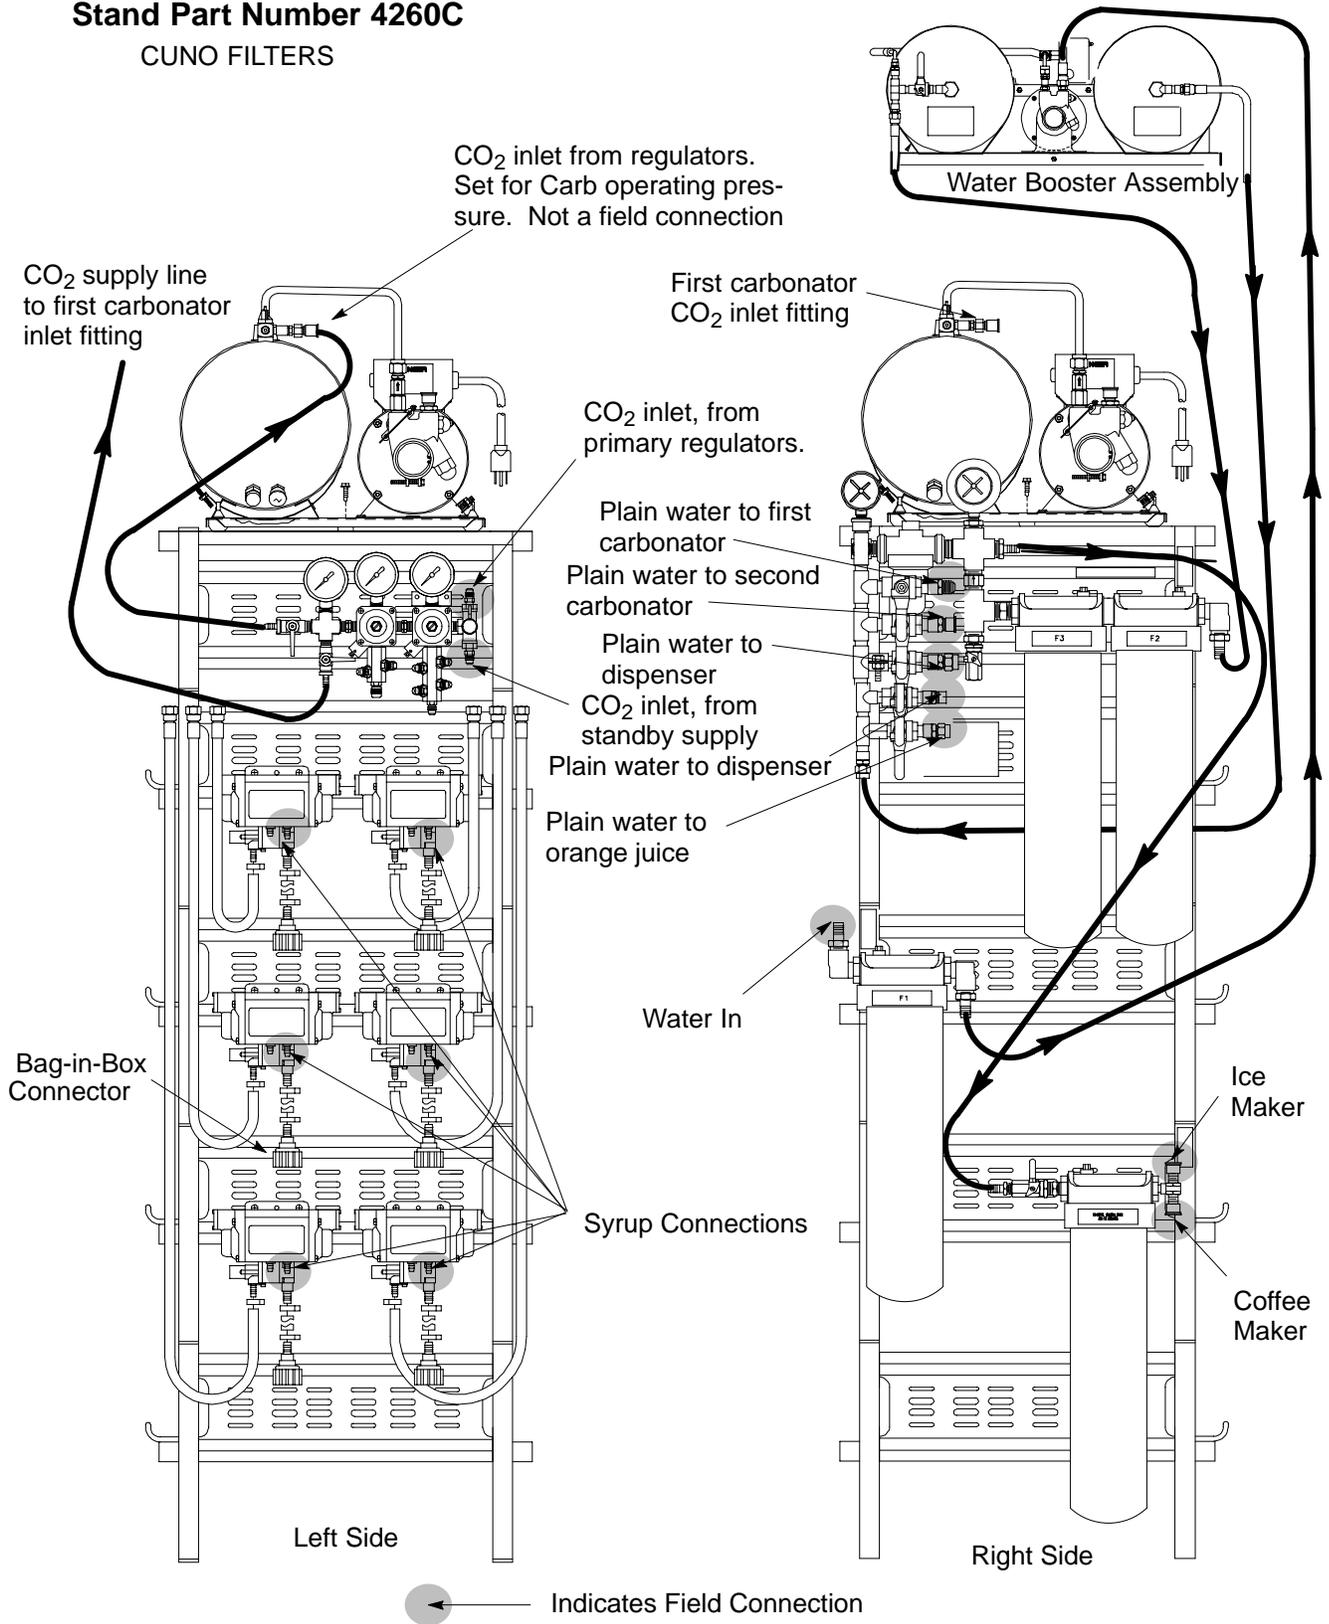

The primary regulators, connected to the CO<sub>2</sub> cylinders must be set at 105 psig. This is the operating pressure for the carbonator.

**CAUTION: This unit must not be installed or used outdoors where it will be exposed to the elements.**

# Stand Part Number 4260C

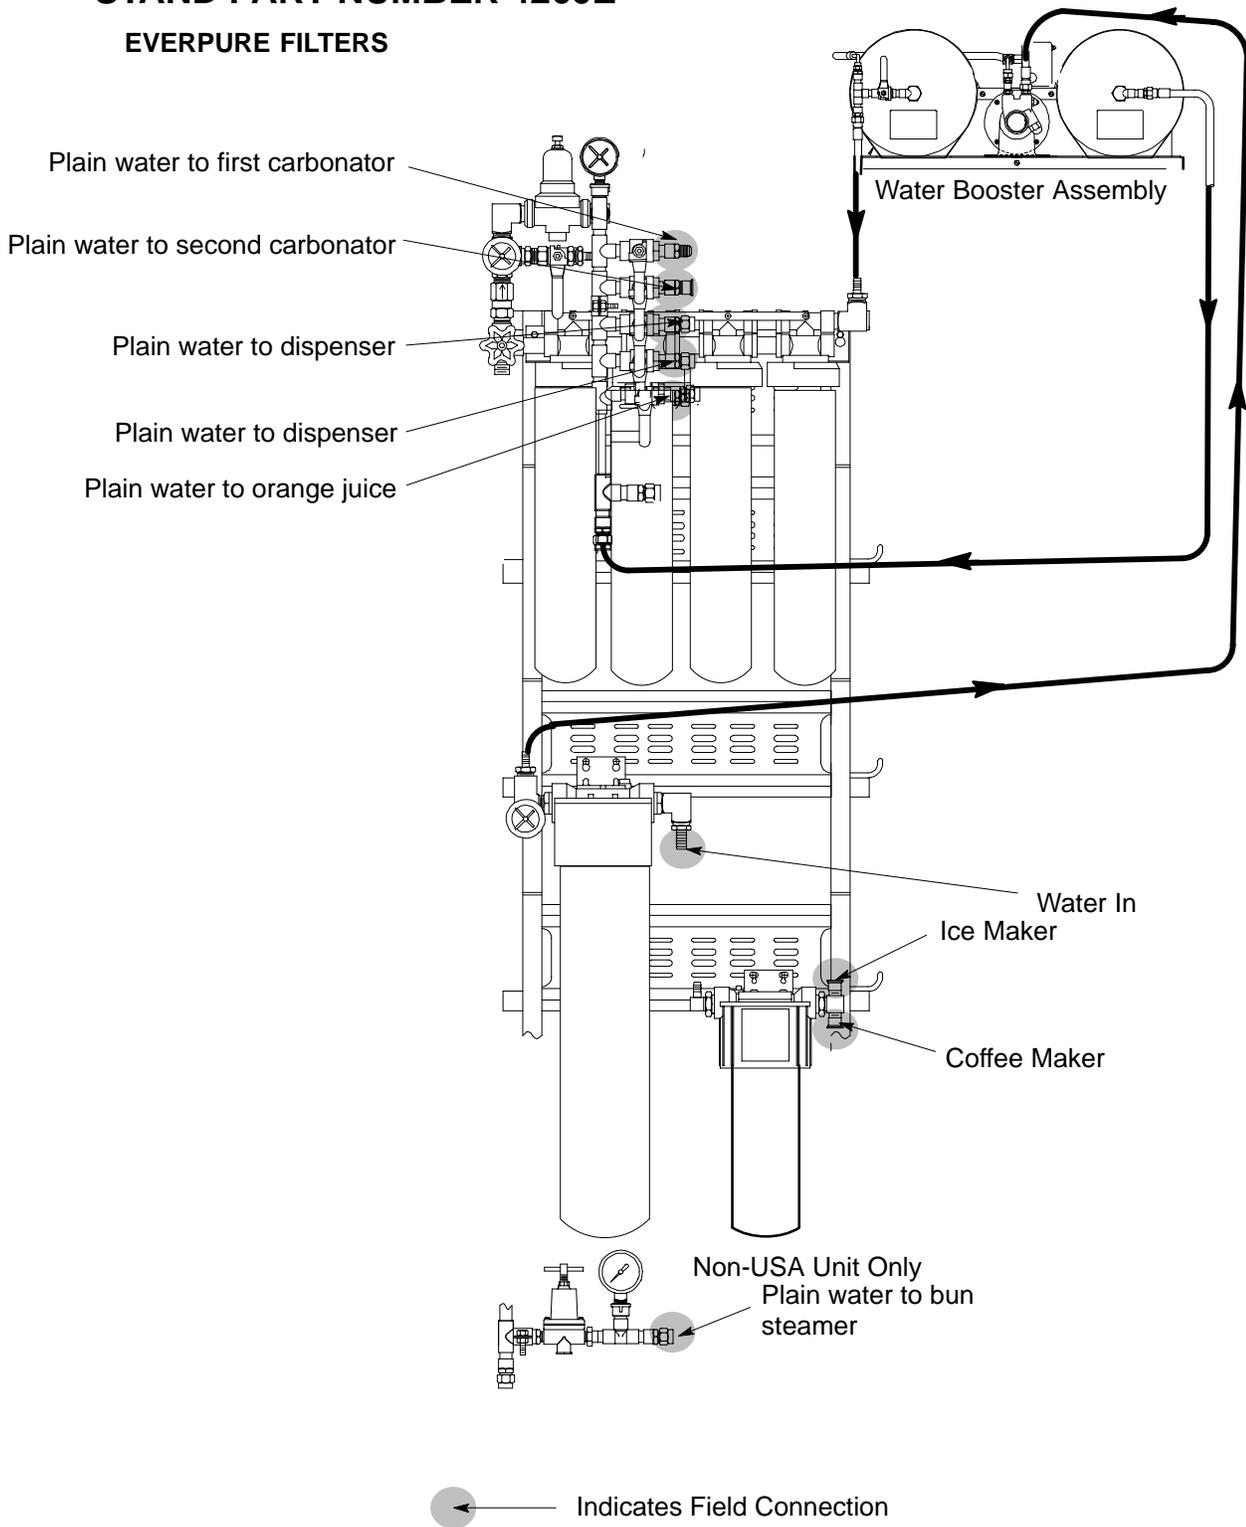

## CUNO FILTERS

NOTE: SOME TUBING CONNECTIONS NOT SHOWN FOR CLARITY

# STAND PART NUMBER 4260E

## EVERPURE FILTERS

**NOTE: SOME TUBING CONNECTIONS NOT SHOWN FOR CLARITY**
