

# INSTALLATION INSTRUCTIONS

## FLAVOR DECALS

The flavor decals must be installed in the tower to advertise the flavors available. The flavor layout can agree with the installation of syrup flavors on the tower but it is not mandatory. Follow the instructions below for the decal installation.

1. Unplug the tower from its power source.
2. Grip the **Merchandiser** on each side in the hand-holds and pull the **Merchandiser** from the tower.
3. Unplug the power cord for the light.
4. Remove the two screws that secure the **Merchandiser Display Panel** to the **Merchandiser Body**.
5. The **Flavor Decal Strip** is now free. Note the decal locations marked on the strip.
6. Remove the backing from the decals and adhere them to the **Flavor Decal Strip** in the proper location.
7. Place the **Flavor Decal Strip** in its location in the **Merchandiser Body**.
8. Return the **Merchandiser Display Panel** and secure with the screws removed in step 4.
9. Plug the light back in and return the **Merchandiser** to the tower.
