

INSTALLATION INSTRUCTIONS

XTREME WATER PAN

Replacement Instructions

1. Disconnect the ice maker from the power supply.
2. Remove the ice maker from the installation.
3. Remove the water curtain.
4. Remove the water pump from the water pan.
5. Remove the pressure sensor fitting from the water pan.
6. Remove the water inlet tube from the water pan.
7. Remove the water pan cover.
8. Locate the two rear plugs at the bottom of the evaporator frame. Use a standard screwdriver to remove these plugs.
9. Locate the two screws that attach the water pan to the bulkhead. Use a short shanked Phillips screwdriver to remove the screws.
10. Remove the water pan through the opening in the bottom of the ice maker.
11. Reverse the above process to install the new water pan.
