

MOUNTING INSTRUCTIONS

FOR ICE DISPENSER MODELS SSD, VSD, ASD, & TJ

The following steps should be followed when mounting dispensers directly to floors or counters, in order to insure a sanitary, water tight seal.

1. Outline dispenser on surface and mark and frill all necessary holes.
2. run a 1/4" wide bead of silastic (Dow 732 RTV or equal), approximately 1/4" inside of the unit outline.
3. Carefully position the unit and set in place. Counter top units should be fastened in place using the threaded holes provided. Silastic which is forced out should be wiped clean while still fresh.
