

KIT #02065

SID350 WALLMOUNT KIT

INSTALLATION INSTRUCTIONS (REFER TO ATTACHED DRAWINGS)

1. Secure the wall mounting bracket to the wall using (6) six 1/2" dia. holes in bracket spaced at 16" on center. (Note that no hardware is supplied as wall construction variations are too great to include hardware for each application.)
2. Hang SID350/35 icemaker on lower lip of wall mounting bracket and secure with 3/8-16 bolts and lockwashers.
3. Attach left and right side of cabinet to wall mounting bracket with 1/4-20 bolts and lockwashers.
4. Plumb and wire icemaker per instructions enclosed with the icemaker.
5. Install utility cover panel with self-drilling sheet metal screws enclosed with the kit. (Note this cover panel also provides added strength to sink area.)
6. Unit is now operational.
