

KIT NO. 2092

INSTALLATION INSTRUCTIONS HOSHIZAKI KM 1200 SERIES ICEMAKER/REMCOR® TJ400 DISPENSER

Use Figure 1 as a guide for the following installation procedure:

- 1) Locate the outline of the icemaker base on the dispenser cover. Run a bead of RTV along this outline and set the icemaker on the dispenser. Wipe away excess RTV.
- 2) Install the adhesive-backed gasket strips on the two (2) lids.
- 3) Locate the lids on the dispenser cover and drill mounting holes into the cover.
- 4) Locate and drill holes into the dispenser rear cover and icemaker cabinet for mounting the rear icemaker brackets.
- 5) Follow the manufacturers instructions to complete the installation of the icemaker.
