INSTALLATION INSTRUCTIONS

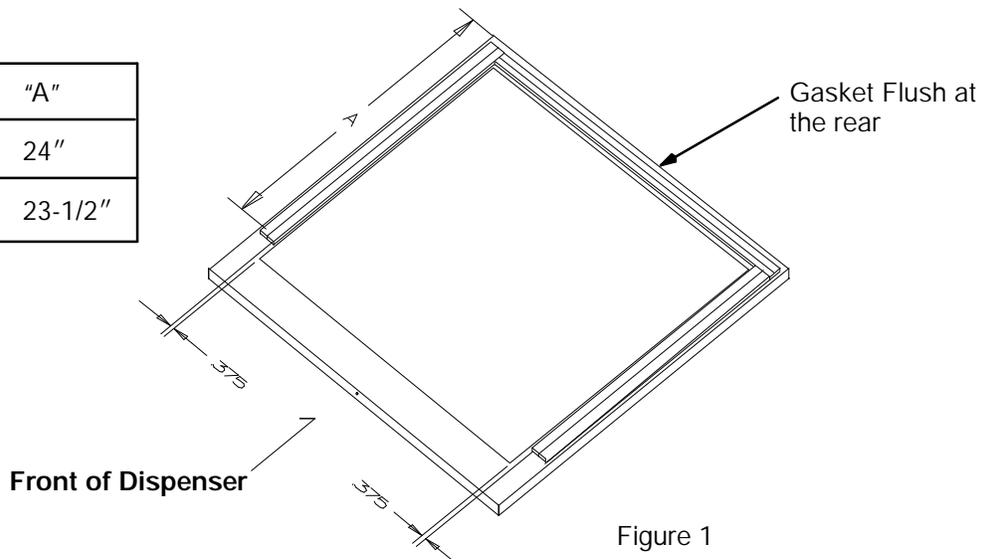

For installation of Scotsman CME1002 or CME650 series ice makers and Cornelius "1" Series ice makers on Remcor™ model DB200 series dispensers.

For Scotsman ice makers use bin level control kit, Scotsman P/N KSB1 for CME 1002 and P/N KSB2 for CME 650

See manufacturers instructions to install the mounting bracket, before installing the ice maker onto the dispenser.

1. Seal the stainless steel cover to the hopper as follows:
 - A. Install the gasket on the cover as shown in Figure 1.
 - B. Apply a bead of RTV sealant on the top of the hopper radius.
 - C. Set the cover onto the dispenser.
 - D. Wipe away any excess RTV sealant.
2. Install ice maker to stainless steel cover.
 - A. Set the ice maker onto the cover and install the bin level thermostat capillary tube. Position the ice maker as shown.
 - B. Apply a bead of RTV sealant around the perimeter of the joint between the ice maker and the dispenser. See Figure 3.
3. Secure the ice maker to the dispenser with the mounting brackets and screws provided. See Figure 2.
4. Install the adhesive backed gasket strip to the removable lid, and install with the screw provided. The lid is included for Scotsman ice makers. For Cornelius ice makers order kit P/N 629081501
5. Follow the manufacturers instructions to complete the installation of the ice maker. Bin level thermostat capillary tube must not interfere with the dispenser agitator.

Ice Maker	"A"
Scotsman	24"
Cornelius	23-1/2"
