

Environmental Policy

As a family owned company, we are committed to reducing the environmental impact of our activities, striving for continual improvement in our systems and utilising industry best practice in our work.

We will:

- Comply with all legal and regulatory requirements including resource consent and designation conditions
 - Implement measures to prevent pollution
- Use resources in an efficient manner, seeking opportunities to reduce our waste to landfill and reduce our potable water consumption
 - Increase environmental awareness among our staff through training programmes
- Identify environmental objectives, focussing on our highest risk activities, measuring and reviewing these at regular intervals
- Work closely with our neighbours and stakeholders to ensure we maintain our social licence to operate

“Building a sustainable future”
