Physical AI for every asset

ABOUT WILIOT

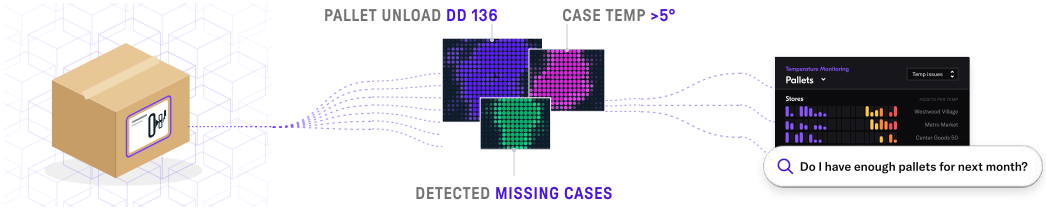

Wiliot provides real-time data mining capabilities for organizations that want continuous visibility into their physical operations. Wiliot is the only multi-modal sensing technology for asset tracking that is cost-effective and scalable across any supply chain, and so much more. If you move physical assets, we have a solution for you.

HOW IT WORKS

TURNING YOUR ASSETS INTO LIVE DATA POINTS

Battery-free IoT Pixels

Bluetooth-enabled tags, thin as a sticker, that can be applied to any asset to turn it into a live data source. One tag senses location, motion, temperature, humidity, and light, reporting multiple times a minute.

- → NO GATES OR PORTALS
- → NO MANUAL SCANS
- → NO BATTERIES TO REPLACE

Wiliot Cloud

Proprietary algorithms refine raw sensor signals into decision-ready intelligence, encrypted end to end.

DESCRIPTIVE
What's happening in my supply chain right now?

PREDICTIVE
What's likely to happen next?

PRESCRIPTIVE
What should I do about it?

Physical AI Platform

One place to see every tagged asset in real time, across any use case. Build alerts, reports, and data apps in plain language with our AI agent, no code required.

UNLOCK MULTIPLE USE CASES FROM ONE DEPLOYMENT

SOLUTION	DATA ENABLED BY WILIOT	YOUR ORGANIZATION'S OPERATIONAL VALUE
Inventory intelligence	Live asset counts by defined area, store, and product	Accurate stock without manual counts, so orders match reality
Automated receiving	Delivery confirmation of assets, checked against what was shipped	Dock-to-stock time cut from days to hours
Reusable asset tracking	RTI location, dwell time and losses by site	Asset shrink and over-buying eliminated, as well as accountability between facilities
Automated shipment verification	Missing and wrong cases flagged before departure	Load errors detected prior to truck leaving, reducing inaccurate and missing deliveries
Temperature monitoring	Temperature excursions by case and zone	Move product on time leading to less spoilage, waste and compliance failures
