

Oslo, April 9, 2006

In the first quarter of 2006, Visma achieved revenues of MNOK 587 (468). The total revenue growth of 25,5% was achieved through organic growth of 11,6% (13,6% in local currencies) in addition to acquisitions made during the last 12 months. The good organic growth in the first quarter is explained by a healthy market in the SME sector and Visma's investments in marketing. EBITDA in the first quarter was MNOK 81 (60), EBITA was MNOK 74 (54), EBIT was MNOK 60, an increase of 42 % from MNOK 42 last year, and EBT was 58 (41). The EBITDA-margin at 13,8% is an improvement over the first quarter 2005 (12,8%). Net cash flow from operations after tax increased by 16% to MNOK 298 (257).

Accounting principles

This report compares the company's reported figures for the corresponding period in 2005 (in brackets), and is prepared according to IAS 34 (IFRS).

Comments on the results in the first quarter of 2006 – Group

Visma achieved 11,6% organic revenue growth (13,6% in local currencies) in the first quarter. The strong organic growth from the 4th quarter of 2005 continued into 2006. This is a result of increased marketing spending and focus on organic growth from the middle of 2005. Even though the board considers organic growth to be most important in creating shareholder value, Visma will continue making selected strategic acquisitions.

The EBITDA-margin in the first quarter in Software was 17,0% (16,8%), in Services 11,5% (9,4%), while Financial & Productivity Services achieved 12,8% (13,9%).

The board of Visma is very satisfied with the healthy margin improvement in Visma Services.

Visma has capitalised MNOK 1,6 R&D expenses in the first quarter 2006. IFRS (IAS38) is more specific than NGAAP on what may be capitalised, and specific projects were capitalised in the first quarter according to IAS38. The Visma group has taken MNOK 0,93 in extra expenses for share based payment.

Net cash-flow from operations after tax was MNOK 298 (257) in the first quarter which is a healthy improvement over 2005.

DSO (Days of Sales Outstanding) were 39 (43) days which is a considerable improvement over 2005.

When assessing the strong improvement over 1Q05 it must be considered that the Easter holidays fell within the 1st quarter in 2005 and the 2nd quarter in 2006.

Visma Services

With MNOK 184 in revenues Visma Services achieved organic revenue growth of 10,0% (11,4% growth adjusted for currency changes) in the first quarter of 2006. This is the strongest organic revenue growth since second quarter 2002. EBITDA margins improved to 11,5% from 9,4% in the first quarter last year. Visma Services has focused on achieving organic growth through increased sales and marketing efforts, but also on improving margins. With increased revenues, utilisation of available human and technological resources has been more efficient, and hence margins have improved.

In the first quarter, especially Visma Services Finland did well with organic revenue growth of 23% in local currency and a solid EBITDA-margin of 32,6%. Visma Services Sweden is back on track after somewhat disappointing results in 2005. Organic growth reached 13% in local currency and EBITDA-margin ended at 11,8% (7,5%). Services Denmark continued its strong performance with organic revenue growth of 29% in local currency and EBITDA-margin of 12,3% (10,3%). EBITDA increased by 48%. Visma Services Norway improved the EBITDA-margin significantly to 9,3% from 8,0% in the first quarter last year. All parts of Visma Services

improved very well over 2005. In all units except Finland, margins may still improve in the coming years.

Visma Software

In the first quarter of 2006, Visma Software achieved organic growth of 11,1% (13,6% in local currencies), which is the highest organic growth achieved in the last couple of years. Including acquisitions, the revenue growth was 25,5%. The EBITDA-margin was 17,0% (16,8%) on revenue of MNOK 342 (254). Recurring revenues from annual support and maintenance agreements amounted to MNOK 172 in the first quarter. This represents a growth of 20,5% and is 50% of the total revenue in the first quarter. Consulting and implementation increased by 52,2% to MNOK 63,3. The most important reason for the positive development is delivery of solutions to the public and the retail sector, which have more consulting intensive projects. New license sale reached MNOK 51,8. Hardware/software from others amounted to MNOK 54,8. Software Norway achieved solid organic growth of 17 % and EBITDA margin of 14,6%. Software Sweden achieved organic growth of 11,3% in local currency, proving that there is still a positive momentum in Swedish market for Visma after the re-branding campaign in 2005. The EBITDA-margin in Sweden was 22,0% (24,1%). Organic growth of -0,3% in Software Finland was somewhat disappointing. EBITDA-margin in Finland was 17,7%. In Software Denmark, the EBITDA-margin was significantly improved to 12,8% (-127,2%).

Visma Financial & Productivity Services

With revenues of MNOK 62 in the first quarter, the revenue growth is 25%. Organic revenue growth was 21,9% in local currency. The EBITDA-margin was 12,8%. Visma Ajourlt is still not achieving satisfactory margins. Actions have been taken to reduce the cost base in 2006. The Swedish debt/invoice collecting unit, Visma Collectors, achieved EBITDA margin of 25,5% and organic growth in local currency of 18%. Visma Collectors in Norway performed satisfactory with organic growth of 16% and EBITDA-margin of 11,7%. Visma Advantage delivered a strong first quarter with EBITDA-margin 37%. Visma Advantage is expanding in Sweden and has the ambition to expand Visma Advantage on a Nordic level. Visma Personnel achieved strong growth of 31% in a market with increasing demand for temp. and recruitment services.

The future

The Nordic business climate is positive, with healthy growth in all markets. The positive trends are expected to continue throughout 2006. In 2006, the Easter vacation is in April compared with March in 2005. This will impact 2Q06 negatively compared with 2005.

In 2006 Visma will continue its activities to sustain organic growth. For Visma there are still opportunities for external growth, and Visma will use its financial strength to make strategic acquisitions.

On 22 March, Sage Group Plc announced that the intention to submit an offer to acquire Visma ASA for a cash consideration of NOK 125 per share. After a successful due diligence Sage has confirmed its offer with an acceptance day at 20th of April.

“With Electronic Debt Recovery we are able to focus more on new business and less on old invoices”

«Almost every manual task associated with debt recovery, including all the paperwork, is no longer necessary», explains Lars Hagman, Credit Manager at DaimlerChrysler Financial Services Sweden AB. The move away from time-consuming manual routines has been welcomed since the automation of credit management processes. The automation of these processes has freed up considerable resources which can now be directed away from administrative tasks and towards bringing in new business. Five years have passed since DaimlerChrysler Financial Services

Sweden AB became tired of handling each case manually. In 2000, the company began working closely with Visma to implement an electronic debt recovery solution. Today, invoices need only be registered once. Visma then takes care of the entire process, including referrals to debt collection authorities if necessary, automatically and in accordance with predefined rules. DaimlerChrysler Financial Services Sweden AB is now working to implement automated solutions in other business areas, such as internal communication and payments.
