Vechta, June 2025

### Prepared for further growth: WELTEC BIOPOWER to expand Management Team as of 1 June 2025

**Effective from 1 June 2025, WELTEC BIOPOWER GmbH will be expanding its management team, thereby strengthening its strategic orientation for the coming years. In addition to the current Managing Director Jens Albartus, Tobias Gerweler and Dirk Krumdieck will also be taking on responsibility at the management level.**

With its expanded management team, WELTEC is responding to the positive business performance and continuous growth of the company. The objective is to efficiently manage the increasing number of orders, clearly structure responsibilities and systematically drive forward the strategic development of the company's various divisions.

Tobias Gerweler, who holds a degree in mechanical engineering from a university of applied sciences, boasts long-standing technical expertise from the industrial sector. Before joining WELTEC, he held leadership roles in industrial engineering, with responsibility for the global industrialisation of technically sophisticated products. At WELTEC, he currently heads the Technology and Projects department. With his engineering background and structured approach to complex systems, he plays a key role in pushing ahead the company's technical and organisational development for current and future projects.

Dirk Krumdieck, who holds a degree in industrial engineering from a university of applied sciences, comes with a wealth of experience gained over many years in the industrial sector. Thanks to his previous leadership roles in sales and project management, he has gained a strong understanding of market mechanisms and business development. At WELTEC, he is in charge of strategic initiatives as well as the Sales and Marketing departments. With his market-driven mindset and cross-functional perspective, he helps reinforce the company's positioning in an increasingly competitive global biogas market.

"I am pleased to welcome Tobias Gerweler and Dirk Krumdieck, two highly experienced and capable partners, to the executive team. Together, we will perpetuate the successful development of WELTEC BIOPOWER and set new impulses for the future", says Jens Albartus, Managing Director and shareholder of WELTEC BIOPOWER.

Jens Albartus will continue in his role as Managing Director. With its expanded leadership team, WELTEC is prepared for a stable, growth-oriented future.

### Company Portrait

Since its foundation in 2001, the **WELTEC** Group from Vechta in Lower Saxony, Germany, has been contributing to the success of the energy transition. The specialist has developed into one of the world's leading providers for the construction and operation of biogas and biomethane plants. The group covers the entire biogas value chain, including the design, planning and setup of energy plants, services, sustainable utilization concepts for the output flows and ongoing or temporary plant operation – an area in which it has more than 15 years of experience.

The establishment of individual, technically mature solutions with custom-tailored processes is one of the strengths of **WELTEC BIOPOWER**. Moreover, the use of stainless-steel technologies ensures flexible substrate input, quick and inexpensive assembly and a consistently high quality standard, regardless of the location. Following the go-live, **WELTEC** can take care of the mechanical and biological service in order to ensure efficiency of the plants.

Apart from the entire biogas value chain, the portfolio also covers agricultural trade including transport, farm services and manure utilization. For **WELTEC**, proximity to customers and investors is very important. These include businesses from industries such as agriculture, food, waste and wastewater. With its global sales and service network, the company has already installed more than 400 energy plants in 26 countries on five continents.
