

Executive Summary

QORE operates as a licensed financial institution, delivering an integrated financial infrastructure that enables companies to manage global financial operations with precision, security, and regulatory confidence.

Our infrastructure is designed to support high-growth businesses, investment platforms, and international operators navigating complex regulatory environments while maintaining operational efficiency and financial transparency.

Through **QORE Finance** and **Tailcor**, we provide a unified ecosystem for global payments, treasury operations, and compliant digital asset brokerage, designed to operate within established EU, UK, and global regulatory frameworks.

Global Payments & Commercial Finance

QORE Finance delivers institutional-grade global financial solutions, specializing in international payments, currency risk management, and commercial finance.

With capabilities across 60+ currencies and transaction reach spanning 160+ countries, QORE Finance enables businesses to move capital efficiently, manage FX exposure, and operate seamlessly across borders.

- International payments and multi-currency operations
- FX and currency risk management
- Commercial finance solutions for global businesses

Compliant Digital Asset Brokerage

Tailcor is an EU-licensed cryptocurrency service provider operating under the Polish regulatory framework, delivering fully compliant exchange and brokerage services.

The platform enables regulated access to digital assets, including crypto brokerage solutions for allocating USDC into tokenized, AAA-rated money market fund assets.

- EU-regulated crypto exchange and brokerage
- Institutional-grade compliance and transaction controls
- Integration of digital assets into broader treasury and financial operations
- Scalable architecture supporting growth across markets and asset classes

Expected Results

Clients benefit from accelerated international transactions, reduced operational friction through centralized infrastructure, and enhanced control over both traditional and digital assets. Our regulatory-aligned architecture lowers compliance risk while supporting expansion into new markets. As a result, organizations scale efficiently, improve financial visibility and focus resources on growth, innovation and strategic execution.
