Doing Well by Doing Good

We partner with the American Heart Association to encourage the recognition of oral health's connection to overall health and offer an array of products focused on dentistry and cardiovascular health through the Heart Health program.

The Global Reflections program has evolved into Practice Green, a new, comprehensive initiative that is designed to provide Henry Schein customers with products, solutions, and services, to help create greener practices and enhance environmental sustainability efforts.

We support health care professionals working to improve the health of vulnerable populations, such as people with disabilities and at-risk children, and through community-based health and wellness initiatives, including the Global Student Outreach Program and the American Dental Association's Give Kids A Smile program.

Henry Schein is committed to promoting early cancer detection, improving access to care, and supporting research and prevention efforts, as well as helping dental and medical health care professionals raise awareness. We also support the American Cancer Society Hope Lodge facilities by donating Welcome Kits for both the residents receiving cancer treatment, as well as their loved ones.

Surgical Sutures

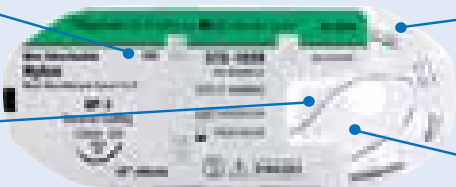

From A Name You Can Trust.

Maxima® Sutures by Henry Schein®

POLYLITH CARD
Helps reduce moisture content, an advantage with absorbable suture materials that degrade by hydrolysis.

NEEDLE PARK
Two needle parks to accommodate a wide range of needle types, sizes, and double-arm sutures. Needle park also protects needles from damage.

RACETRACK FEATURES AND BENEFITS

LARGER DIAMETER
Larger overall diameter to ensure less suture memory and minimize the number of suture rotation around track.

PRESS-PUSH NEEDLE LIFT
The tab, when pressed from behind, lifts for easy needle removal.

- Silicone-coated 300 series stainless needles give finer point geometry for superior penetration
- Precision needles are strong enough to resist bending, yet ductile enough to resist breaking
- Racetrack packaging helps reduce material memory as the suture is released from the track
- Large breadth of suture and needle combination for a range of surgeries
- Significant cost savings for your clinic compared to the leading brand
