

 ATSC

The SSS is a modular, scalable, lightweight ground-based security and surveillance system with rapid deployment capabilities. SSS includes a variety of short- and long-range Electro-Optic (EO) and Infrared (IR) cameras along with radar and surface/sub-surface seismic detection systems to provide situation awareness to the commander through wireless and wired networking capabilities.

SILENT SENTINEL

AERON - Mid Range Thermal PTZ

Suitable for maritime, aviation, perimeter and mobile security applications. With a high level of accuracy (0.05°), the Aeron is capable of fast pan and tilt speeds (up to 160° per second) with 360° continuous rotation, absolute positioning and advanced illumination options.

ECHODYNE

ECHOGARD RADAR

The leading 4D radar for high performance ground and air surveillance of defense government, and critical infrastructure assets.

CAMBIUM NETWORKS

PTP700

The most broadly deployed, battlefield optimized, COTS+ (Commercial-off-the-shelf + MILSPEC), turnkey tactical radio system. Currently deployed in support of multiple Federal Agency and Department of Defense Programs of Record (PORs)
