

Smart Pension

Smart Pension Investment Report Quarter 1, 2026 (Wahed)

smartpension.co.uk

Welcome to your investment report

This report is for members of the Halal Workplace Pension section of the Smart Pension Master Trust. If you did not make an active choice, your money is invested in the Wahed default investment strategy. This has been designed to be suitable for most members and uses a combination of investment funds depending on how close you are to your target retirement age.

Pensions are an investment. As a pension saver, your savings will be affected by a whole host of factors that influence the returns of, for example, stocks and shares over the lifetime of your savings. The first section of this report gives an overview of events in the financial markets and the economy over the last three months, and why you may have seen the value of your pension savings grow or shrink.

Remember, markets can go up and down quite a lot over the short term. Pensions are a long-term investment and, as our funds are invested for the long term, this report should not be used to make investment decisions. This report gives a generalised perspective and is not specifically focused on any single fund option.

Our investment strategies are made up of multiple different funds that react differently to market events. That's why, in the second section of this report, we have included the most recent performance data for all our funds. This shows you how they have been performing over the past three months. Performance over one year, three years and five years will be shown when the funds have been in existence for those time periods, at Smart Pension. How your own savings are doing will relate to these performance figures.

We have also included a glossary at the end to help you with any terminology that may be unfamiliar to you.

What's been happening in the markets?

Market overview

The first quarter of 2026 was defined by a sharp pivot in global sentiment as geopolitical instability and protectionist trade policies refuelled inflationary fears. The escalation of conflict in the Middle East, specifically involving strikes on Iran and the effective closure of the Strait of Hormuz, a major shipping route for Middle Eastern oil, caused oil prices to surge, rising 63% (Brent Crude, a major benchmark for Oil prices per barrel) in March alone to surpass \$100 per barrel. This energy shock abruptly ended the narrative of cooling inflation, forcing markets to shift from anticipating interest rate cuts to pricing in potential hikes. Adding to the volatility, the US administration is looking to implement a flat 10% global tariff on all imports, further complicating the global trade outlook and pressuring supply chains.

As a result, global equity markets struggled with the MSCI World Index declining by 3.6% as investors worried about geopolitical conditions. US shares were particularly volatile; the S&P 500 declined 4.3% for the quarter, as market sentiment is rotating away from traditional software-as-a-service (SaaS) companies as investors feared AI disruption to subscription models. In contrast, the UK's FTSE All-Share proved resilient, returning 2.4% due to its heavy weighting in energy and basic materials, alongside a weaker sterling that bolstered exporters. European markets (ex-UK) fell 2.3% as the region's sensitivity to energy prices and growth concerns intensified. Emerging markets outperformed their developed counterparts but still ended slightly negative (-0.1% in USD terms); while early-quarter gains in Korea and Taiwan were driven by AI-related technology demand, these were partially erased in March by the energy price shock when the Iran conflict started. Japanese equities (TOPIX) gained 3.6% following a political election in February and the continued fall in the value of yen.

Gold commodities performed positively and attributed positively to performance, dampening the losses seen from global equities.

The Wahed funds performed slightly negatively over the quarter. The Growth+ Fund performed more resiliently than global equities. The funds have performed as expected; the lower risk fund, the Balance Fund, outperformed the Growth and Growth+. The Balance fund has a target allocation of 50% in Islamic bonds, called "Sukuk".

How have our funds performed?

This quarter's performance tables

This table shows you the returns for each fund over different time periods. All values are as of 31 March 2026.

All values are shown net of charges. You can learn more about the charges applicable to you in your online account.

Fund performance

Funds	3m	1y	3y	5y
Smart Wahed Growth+	-1.2%	22.4%	Funds have been in existence for less than three years.	
Smart Wahed Growth	-0.2%	21.2%		
Smart Wahed Balance	0.3%	13.3%		

Note: The funds' performance is shown for the time that they have been on the Smart Pension platform. Net of fees performance, sourced by Mobius Life and Smart Pension.

How do we manage your money?

Your pension scheme is managed by a group of independent and non-affiliated trustees. They look after your interests and work for you. Your relationship is with the Trustee, not Smart Pension Limited.

The Trustee keeps an eye on:

- the investment strategy
- how your investments are performing
- value for money
- member communications
- member engagement

The Trustee looks after your money to ensure it is invested in line with the statement of investment principles.

The statement of investment principles is a trustee document that outlines the way Trustee will invest the scheme assets. This also includes the Trustee's policy on responsible investment (also known as Environmental, Social and Governance (ESG) issues).

The Trustee works alongside fund managers and the scheme's investment adviser to ensure performance is in line with agreed benchmarks. You can view the statement of investment principles [here](#). You can also view the trustees' ESG policy [here](#).

Trustees

Raj Mody, Chair of Trustee

Raj Mody joined the Smart Pension Master Trust Board in 2025. He brings over 30 years of experience in the pensions industry, spanning Defined Contribution, Defined Benefit, technology, policy, and governance. He has held several senior executive and non-executive roles, with a portfolio of Board and Chair appointments. He was previously a Partner at a Big 4 professional services firm, leading their retirement consulting business in the UK and globally. You may have seen his expert commentary cited in the media, with a strong focus on member outcomes. Raj is a Fellow of the Institute of Actuaries and has been voted one of the top 20 most influential people in the pensions industry.

Anna Darnley, Trustee Director

Before joining the Trustee Board in September 2019, Anna was a trustee of the Accenture Retirement Savings Plan (UK). She previously worked as a digital strategy consultant with Oliver Wyman specialising in the design, build and launch of digital banks and retail investment apps in East Asia. She currently works as a Senior Product Manager for a leading payments app.

David Brown, Trustee Director

David joined the Smart Pension Master Trust Board in October 2018. He is a Fully Accredited Professional Pension Trustee with a range of Board appointments. David has over 35 years' experience worldwide in the pension and investment industry, working as an operator and consultant. He has worked for two of the Big Four consulting firms and was the UK and ROI Pensions and Payroll Manager for Tesco.

Nikesh Patel, Trustee Director

Nikesh Patel joined the board in 2021 and chairs our investment sub-committee. He has nearly two decades of experience in consulting trustees and employers on defined benefit (DB) and defined contribution (DC) pension schemes on all investment matters, including as an award-winning Chief Investment Officer for his role in managing the assets for a number of pension funds in the UK. He has a keen interest in responsible investment, alongside a deep expertise in both public and private markets. He is an actuary by training and is also a trustee director of the Church of England Pensions Board.

Kim Gubler, Trustee Director

Kim Gubler joined the Smart Pension Master Trust Board in May 2024. Kim has over 30 years' experience in the pensions industry, including as a founding director of the Pensions Administration Standards Association (PASA) and has been its Chair since 2019. She is a Fellow of both the Pensions Management Institute (PMI) and the Pensions Advisory Service and was an independent Trustee Director of the Crystal Master Trust. Kim sits on the Pension Dashboards Programme Advisory Group and DWP's Default Consolidator Delivery Group and is the PMI's Principal Examiner for Professionalism and Governance.

Paul Bucksey, Trustee Director

Paul joined the Smart Pension Master Trust Board in June 2025. He is passionate about helping individuals build wealth via the workplace and has spent more than 20 years working for some of the UK's leading workplace pension providers. Prior to joining the Board, up until December 2024, he served as Chief Investment Officer of the Smart Pension Master Trust, where he also chaired the Scheme Strategist. Before his time at Smart Pension, Paul was Managing Director at BlackRock and later Aegon, where he led their UK defined contribution workplace pension scheme. He is also an independent member of the Prudential Independent Governance Committee.

The trustees would love to hear from you

The trustees are keen to get as much feedback as possible about how they can improve the pension scheme. If you have a suggestion, please do not hesitate to contact them at trustees@smartpension.co.uk.

Glossary

Bonds

A bond represents a loan made by an investor to a borrower and is often referred to as a fixed income security. This is because fixed interest payments are made as part of the returns. They can be issued by a government to raise money for things like infrastructure projects, or by private or public companies.

Central banks

Central banks around the world set the base interest rates of a country. The setting of these rates is part of something called monetary policy. For instance, increasing interest rates makes it more expensive to borrow and more profitable to save. In theory, this means people would spend less and save more, taking money out of circulation from the economy and reducing inflation rates. Reducing the interest rates level would have the opposite effects. Too high, very low or negative inflation rates can be bad for the economy.

Equities

Shares in publicly-traded companies such as Apple, Facebook, BP or HSBC. They are grouped in major indices depending on the country in which they are traded. (for instance the FTSE in the UK, or the Dow Jones in the US).

Equity index

An index is a number that represents the value of a group of stocks and shares, often combined by country and/or type of companies. For instance, the UK FTSE 100 is an index that represents the value of the largest 100 companies in the UK. Similarly, the Dow Jones Index is representative of the 50 largest companies in the United States.

Inflation

Inflation is a measure of the rate at which the average price of a “basket” of goods and services in an economy increases over a period of time. As the cost of goods rises, a single unit of currency for example, (£1) buys fewer and fewer goods and services. This loss of purchasing power has an impact upon the general cost of living. Excessive inflation makes goods and services too expensive to buy and is bad for the economy.

Interest rate

An interest rate is the amount to be paid over a given period and is given as a proportion of the amount lent, borrowed or saved. For example, if you saved £100 in an account with a 1% annual interest rate, then after one year you would be paid £1 in interest.

Investment strategy

Is a way of investing your money over time with the aim of growing your pension savings. As you get closer to your retirement age, we move your money into funds that are less likely to fall in value.

The default fund

Unless you actively choose otherwise you will automatically be invested in our default fund during the growth phase, up to eight years before your selected retirement age. Our default fund is the Smart Growth – Moderate Risk fund. It has been created so that it will typically suit most of our members.

The default strategy

If you do not make an active investment choice, your savings will be invested according to the default strategy. It uses our default fund during the growth phase, and then switches to funds designed to protect your savings as you approach retirement. The full details of the default strategy can be found in our investment guide.

Volatility

Volatility refers to the amount of risk or uncertainty due to the size of changes in value (of currencies or equities).
