FRANLAB™ for ART

DESIGNED TO BECOME UNMISTAKBLY YOURS.

“ALL ARTS CONTRIBUTE TO THE GREATEST ART OF ALL: THE ART OF LIVING”

- Bertolt Brecht

INNOVATION MEETS ARTISTRY

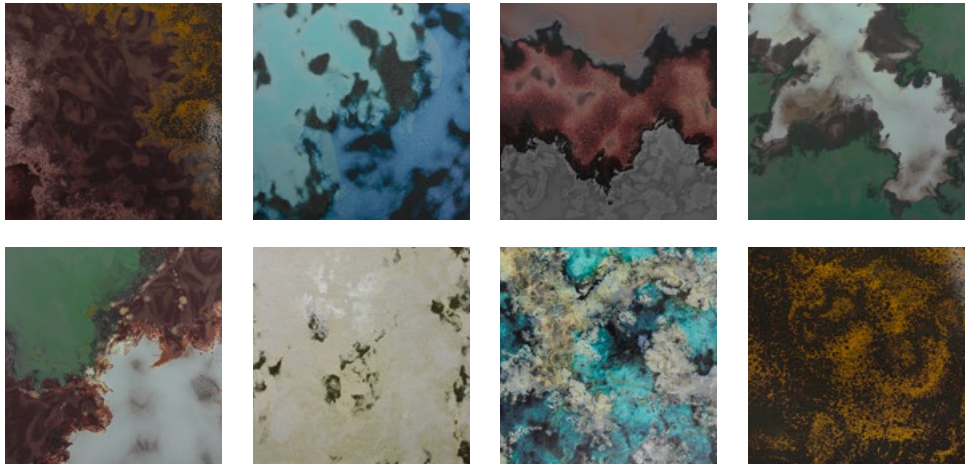
A **new chapter** dedicated to art begins, inviting artists, designers and **different cultural voices** to reinterpret our architectural surfaces.
Art becomes a way of **pursuing beauty**: a balance of material, proportion, light and form. Through these collaborations, technical precision meets artistic sensitivity, transforming functional elements into **distinctive** architectural presences.

Beauty dialogue

FRANLAB™

Art gives life to beauty, bringing it into the spaces we inhabit and transforming each environment into a unique expression of identity. Nature, space and architectural vision merge in refined harmony, where material, light and landscape become one. From this seamless fusion, beauty emerges—emotional, distinctive and timeless.

FRANLAB x DOMIZIANI

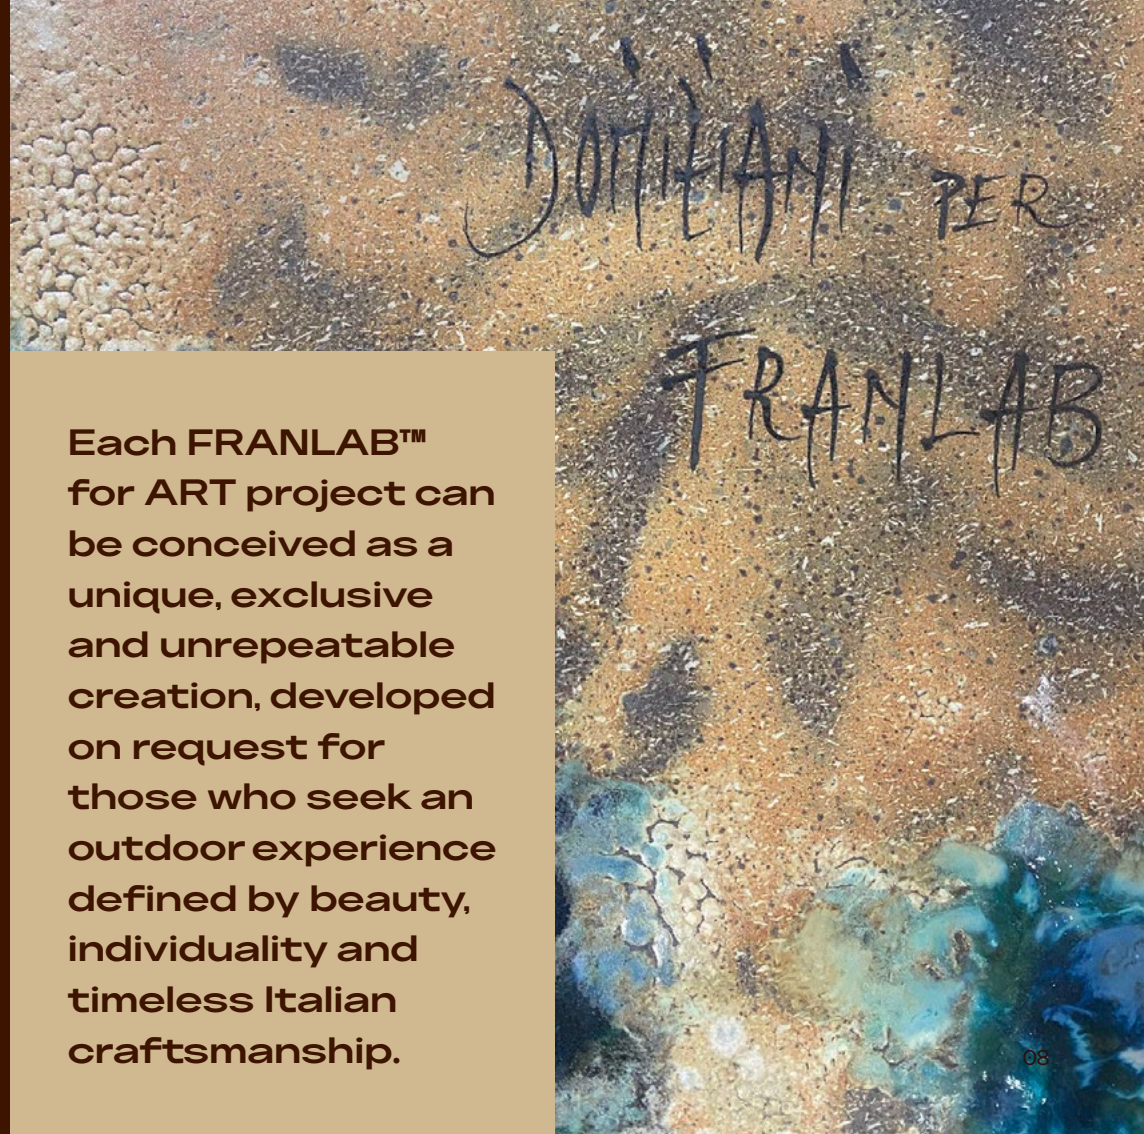


FRANLAB™ for ART is the artistic platform through which FRANLAB™ opens its architectural surfaces to new creative interpretations. It is conceived as a space for exclusive collaborations, where stainless steel, material expression, colour, texture and craftsmanship become part of a refined outdoor design language. Within this vision, the collaboration with Domiziani gives rise to the project's first exclusive signature:
Domiziani per FRANLAB™.

A unique artistic surface.

Born from the encounter between the architectural essence of FRANLAB™ and the refined material sensitivity of Domiziani, this signature transforms the privacy screen into an expressive architectural surface.

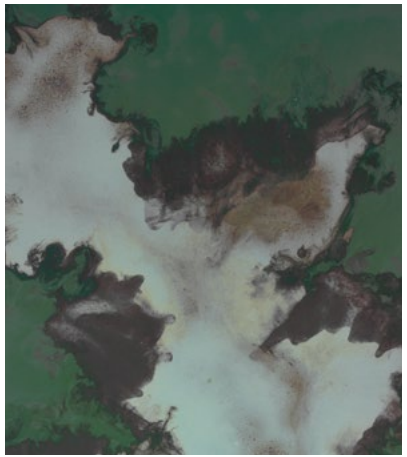
Handcrafted gestures, decorative finishes and natural inspirations enter into dialogue with light, landscape and space, creating bespoke compositions shaped around the identity of each project. Privacy is no longer simply a functional requirement; it becomes a refined architectural statement.



Each FRANLAB™ for ART project can be conceived as a unique, exclusive and unrepeatable creation, developed on request for those who seek an outdoor experience defined by beauty, individuality and timeless Italian craftsmanship.

FRANLAB™ and Domiziani Come Together

Architectural precision meets artistic sensitivity and the timeless strength of nature. Stainless steel enters into dialogue with Domiziani's lava stone, enriched by artistic colours applied entirely by hand. Each surface is unique and unrepeatable, shaped through contemporary processes deeply rooted in the excellence of the Italian ceramic tradition.
Domiziani for FRANLAB™ becomes an exclusive artistic signature, connecting architecture, material and landscape in bespoke compositions of unmistakable identity.



Texture

Born to be unique.

Every FRANLAB™ for ART project begins with a desire: to create an outdoor space that protects, inspires and reconnects us with nature.
Stainless steel, ceramic surfaces, colour, texture and light shape bespoke compositions in harmony with the identity of each place.
The result transcends function: an elegant, expressive and deeply personal architectural presence—created to experience beauty, freedom and the essential pleasure of being yourself.
