Hybrid
Spec Sheet

Specifications

Introducing the Expandable Hybrid – a versatile solution designed for situations requiring a low step height. Once detached and installed, the chassis stands just 38 cm off the ground, providing easy access. The Expandable Hybrid features a glass wall and sliding doors, creating a transparent and inviting space.

With a total length of 12.6 meters, the Expandable Hybrid includes an internal space to discreetly store the axle assembly after installation, seamlessly integrating into the trailer's interior design. Our Hybrid can be transported to any desired location using either a normal or a low-deck truck. The setup is effortless with our hydraulic remote control system, allowing you to set up with just the press of a button.

Hybrid
