# MATTE series

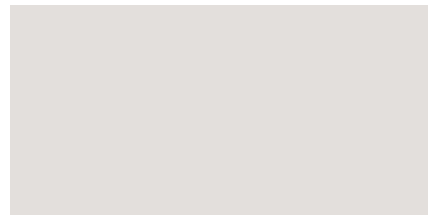

## slab door

- 22mm thick OSB core
- Dual sided material
- 1mm thick edgebanded on all sides
- Specialty matte surface

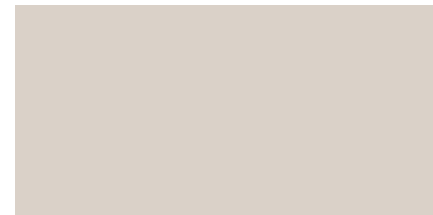

## available finishes

PET-1 ALABASTER PEARL

PET-2 MOONSTONE

PET-3 MACCHIATO

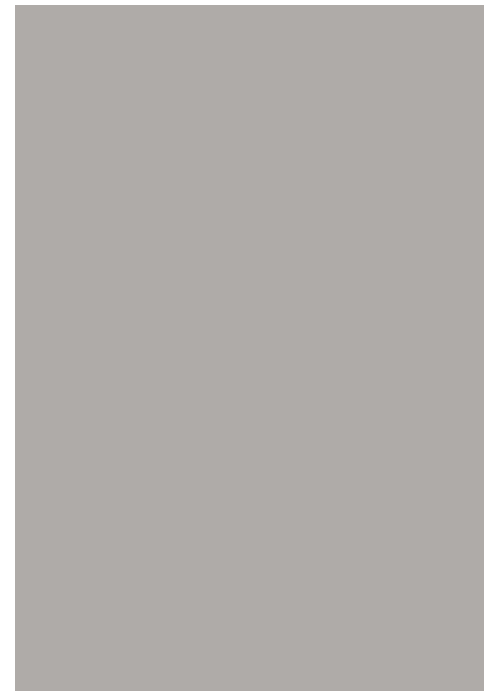

PET-4 FOGBOUND

PET-5 PEPPERCORN

PET-6 CAVIAR

# NATURE series

## slab door

- 22mm thick OSB core
- Dual sided material
- 1mm thick edgebanded on all sides
- Textured wood grain surface

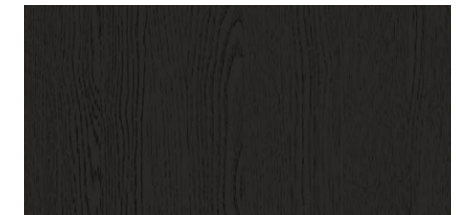

## available finishes

RM-4 HAVEN WALNUT

RM-6 SANDBEACH OAK

RM-7 RAVENWOOD OAK

RM-8 CLAYBAKED CYPRESS

RM-9 RIVIERA ELM

RM-10 EVERLIGHT OAK

RM-11 WEATHERED ELM

RM-12 CANDLELIGHT ELM

RM-13 STONEWATER OAK

RM-14 WINDBRISK CYPRESS

# LINEN series

## slab door

- 18mm thick OSB core
- Dual sided material
- 1mm thick edgebanded on all sides
- Real feel linen surface

## available finishes

RM-1 STERLING LINEN

RM-2 ALLOY LINEN

RM-3 GRAPHITE LINEN

## RM-1 STERLING LINEN BOX

The RM-1 Sterling Linen Box features a clean, light gray linen-textured finish on the cabinet carcass, interior shelves, and all structural components. This contemporary neutral tone provides a bright, modern appearance while offering excellent durability and a smooth, uniform surface throughout the interior and exterior of the box.

## RM-4 HAVEN WALNUT BOX

The RM-4 Haven Walnut Box showcases a rich, dark walnut wood grain finish applied to the entire cabinet carcass, interior shelves, and base. This sophisticated warm-toned finish delivers a premium, natural wood aesthetic with deep grain character, creating an elegant and timeless look for the structural components of the cabinet.

## GOLA CHANNELS (-GL)

The Gola profile system delivers a true handleless cabinet solution using recessed aluminum channels mounted to the cabinet carcass. This creates a clean, minimalist appearance with an integrated finger-pull for comfortable operation.

Finishes: Black, Grey, Gold

Lighting Options: Non-lighted or Integrated COB LED

## HANDLESS BEVEL DOORS & DRAWERS (-BV)

Elevate your kitchen or bathroom with the sleek, minimalist look of our Handleless Bevel door and drawer option. This modern profile features a subtle 45-degree bevel along the top edge of the door and drawer fronts, creating a natural finger-pull recess without the need for visible handles or knobs.

Key Features:

- Subtle 45° bevel edge creates a functional yet elegant finger-pull groove
- Available on both doors and drawer fronts for a fully coordinated look
- Perfect for contemporary, transitional, or minimalist interiors where hardware would disrupt the visual flow.

## METAL FRAME GLASS DOOR OPTIONS

Our metal frame glass doors offer a refined, modern alternative to traditional cabinet fronts, combining clean lines with a durable aluminum frame construction. Designed to showcase interior contents while maintaining a structured, architectural look, these doors are ideal for feature areas such as display cabinets, upper walls, and specialty installations. Frames are available in three finishes—Black, Gray, and Gold—allowing for seamless integration into a wide range of design styles. This option delivers a sleek, contemporary aesthetic with a strong emphasis on detail and material contrast.

Black

Gray

Gold

## GLASS INSERT OPTIONS

Our metal frame glass doors are paired with a curated selection of six distinctive glass insert options, each offering a unique balance of transparency, texture, and visual impact. From clean, subtle finishes to bold decorative patterns with metallic accents, these options allow you to control both visibility and design expression within the space. Textured and layered glass styles help diffuse light and soften visibility, while more decorative options create a statement feature within the cabinetry. Each insert is carefully selected to complement the metal frame system, providing flexibility to achieve anything from understated elegance to a more expressive, design-forward look.

Textured White

Textured Black

Decorative Wire

Gray coated

Silk Gold

Gold Leaf

## MODIFICATIONS

### Reduce Depth

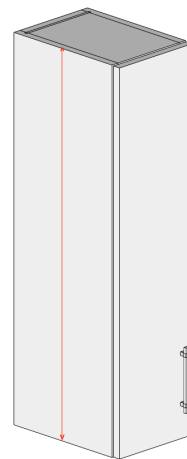

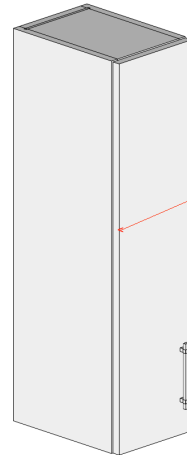

The Reduce Depth modification allows the cabinet to be manufactured at a shallower depth than standard specifications to better suit unique layout requirements. This is commonly used in tight spaces, walkways, or areas where full-depth cabinetry may interfere with clearances or adjacent elements. All modifications are executed with precision to maintain structural integrity and overall product consistency.

### Reduce Width

The Reduce Width modification allows the cabinet to be manufactured narrower than standard dimensions to accommodate space constraints or specific layout requirements. This is commonly used for tight filler areas, appliance integrations, or unique design conditions. All adjustments are engineered to maintain structural integrity and alignment with adjacent cabinetry.

### Reduce Height

The Reduce Height modification allows the cabinet to be produced shorter than standard specifications to fit beneath soffits, windows, or other architectural elements. This adjustment ensures proper fit within the space while maintaining the overall design intent. All modifications are executed to preserve structural stability and visual consistency.

## MODIFICATIONS

### Increased Depth

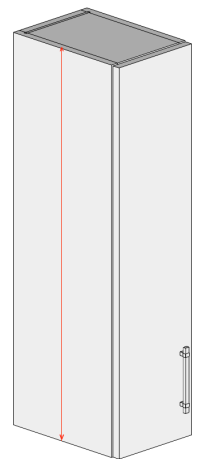

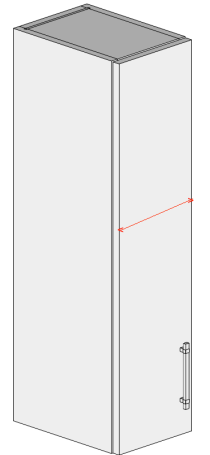

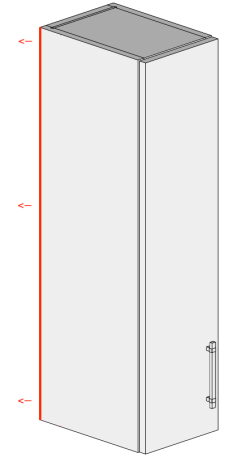

The Increase Depth modification provides the flexibility to manufacture cabinets deeper than standard dimensions to accommodate specialized storage needs or design intent. This option is ideal for maximizing storage capacity, integrating appliances, or creating a more substantial visual presence. Extended depths are engineered to maintain proper support and alignment with surrounding cabinetry.

### Increase Width

The Increase Width modification provides the flexibility to manufacture cabinets wider than standard sizes for expanded storage or design continuity. This option is ideal for creating larger uninterrupted cabinet runs or accommodating custom layouts. Extended widths are carefully constructed to ensure proper support, durability, and consistent performance.

### Increase Height

The Increase Height modification allows cabinets to be manufactured taller than standard dimensions to maximize vertical storage or achieve a more integrated, floor-to-ceiling appearance. This is commonly used in high-ceiling applications or custom design features. Increased heights are engineered to maintain strength, alignment, and a cohesive finished look.

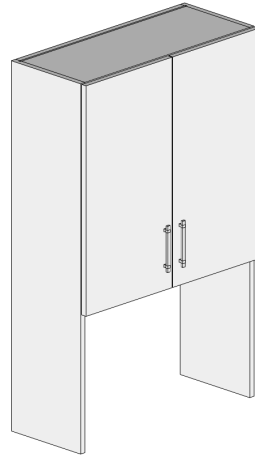

## MODIFICATIONS

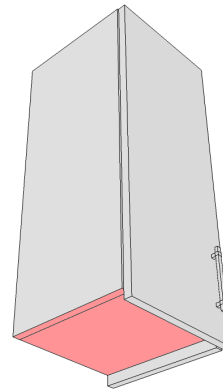

### Extend Sides Down

The Extend Sides Down modification extends the cabinet end panels below the standard bottom, allowing wall cabinets to function as open hutch-style units. This creates a clean, furniture-style appearance while providing additional vertical coverage for decorative or functional applications. This modification is often used in custom kitchen designs, coffee bars, or built-in feature areas.

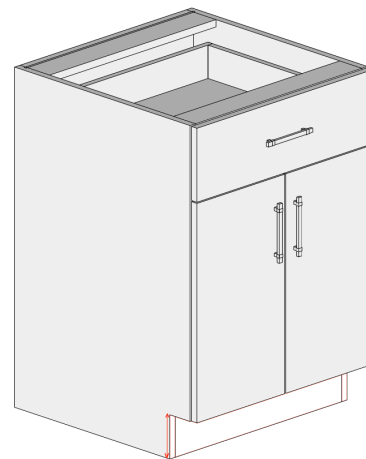

### Recess Floor

The Recess Floor modification raises the cabinet's bottom panel, back, and unfinished sides, creating a concealed cavity on the exterior underside of the cabinet. Any finished ends will remain unchanged. This space is designed to accommodate integrated lighting, wiring, or other components while keeping them hidden from view. As a result, usable interior height is slightly reduced. This modification delivers a clean, uninterrupted appearance while supporting modern lighting integration.

### Adjust Toe Kick Height

The Adjust Toe Kick Height modification allows the base cabinet's toe kick dimension to be customized to meet specific design or installation requirements. This is commonly used to align with varying floor conditions, achieve a desired finished height, or accommodate accessibility considerations. Adjustments are engineered to maintain cabinet stability and proper proportions while ensuring a clean, consistent appearance across the installation.

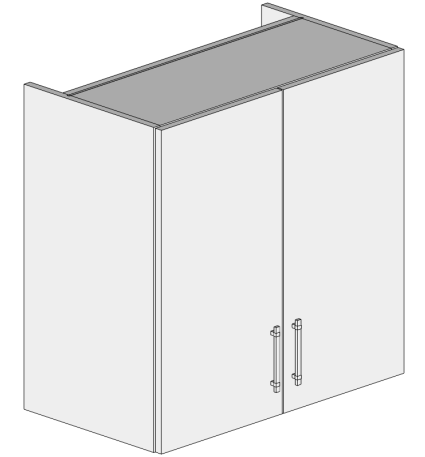

## MODIFICATIONS

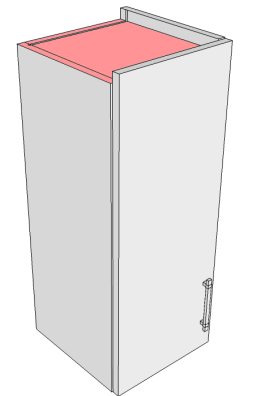

### Extend Sides Back

The Extend Sides Back modification extends the cabinet end panels beyond the standard rear depth to accommodate wall irregularities, plumbing, or other site-specific obstructions. This allows the cabinet to achieve a cleaner, more seamless installation by bridging gaps or wrapping around minor inconsistencies in the wall surface. This modification is especially useful in remodel applications where walls are not perfectly plumb, ensuring a more refined finished appearance without the need for excessive fillers or on-site adjustments.

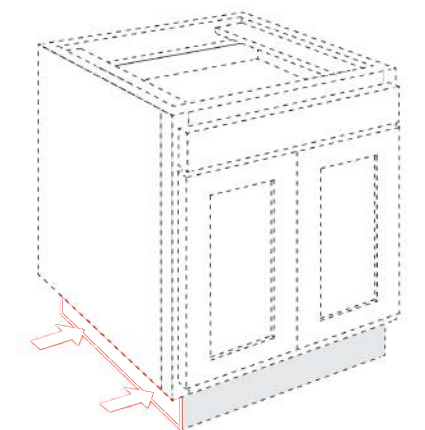

### Recess Top

The Recess Top modification lowers the cabinet's top panel, back panel, and unfinished sides, creating a concealed cavity on the exterior top of the cabinet. Any finished ends will remain unchanged. This allows for the integration of lighting, wiring, or other design elements above the cabinet while maintaining a seamless exterior appearance. This modification will reduce the usable interior height of the cabinet, but provides a refined solution for concealed installations.

### Recess Toe Kick

The Recess Toe Kick modification allows the toe kick to be set back on the left side, right side, or both sides of the cabinet to accommodate adjacent conditions or design requirements. This is commonly used when cabinets terminate against walls, panels, or obstructions, or when a more intentional side profile is desired. By selectively recessing the toe kick, this modification helps maintain clean alignment with surrounding elements while providing flexibility for a refined, built-in appearance.

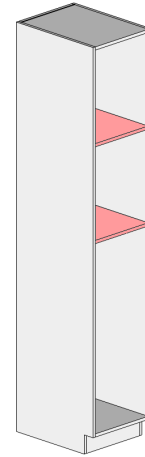

## MODIFICATIONS

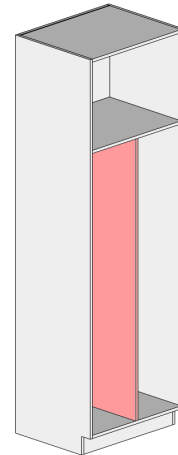

### Add Fixed Shelf

The Add Fixed Shelf modification incorporates a permanently installed shelf within the cabinet to provide enhanced structural support and consistent organization. Unlike adjustable shelving, the fixed shelf is secured in place with dowels, offering increased rigidity and a clean, integrated appearance. This option is ideal for reinforcing wider cabinets, supporting heavier loads, or creating defined storage zones within the cabinet interior. Fixed shelves are flush with the front of the case.

### Add Vertical Partition

The Add Vertical Partition modification introduces a fixed vertical divider within the cabinet to create separate interior compartments. This is ideal for applications such as broom closets, utility storage, or organizing tall items where defined sections improve functionality and accessibility. The partition is securely integrated into the cabinet structure, maintaining overall strength while providing a clean, organized interior layout. Vertical partitions must be installed between two fixed shelves.

## HÄFELE AXILO LEG SYSTEM

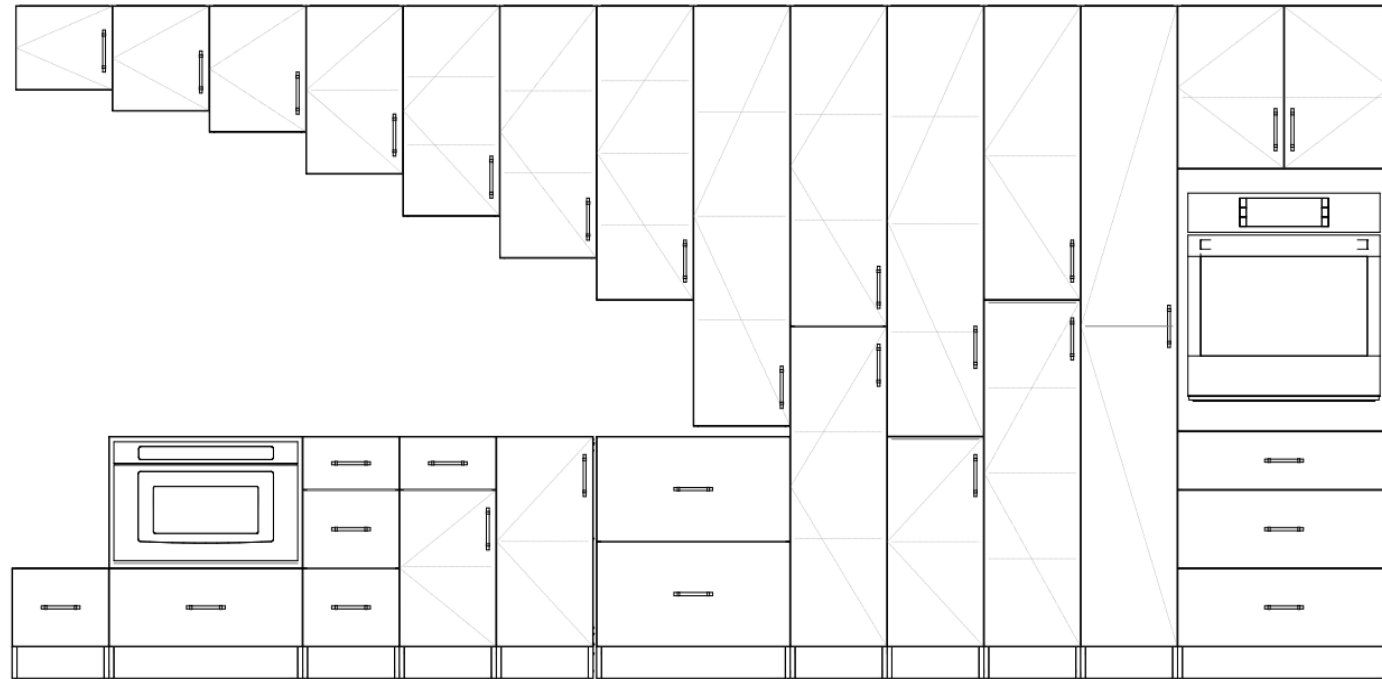

The Häfele Axilo Leg System is a high-performance adjustable leg solution designed for precise cabinet leveling and long-term stability. This system allows for quick and accurate height adjustments, even after installation, using a specialized adjustment tool. Ideal for uneven floors or complex installations, Axilo legs improve efficiency during installation while delivering a clean, professional result.

[Watch the adjustment video here](#)

## SHELF QUANTITIES

### Cabinet Shelf Quantities

#### Base Cabinets

- Base= 1 shelf
- Base Full Height= 1 shelf
- Blind Corner= 1 shelf
- BER Corner= 1 shelf

#### Wall Cabinets

- Wall 12" - 18" high= no shelf
- Wall 21" - 36" high= 2 shelves
- Wall 36+" - 54" high= 3 shelves
- Wall 54+" = 4 shelves

#### Tall Cabinets

- Tall Pantry 84" high= 4 shelves
- Tall Pantry 96" high= 5 shelves
- Tall Pantry 108" high= 6 shelves
- Tall Oven 84" high= no shelves
- Tall Oven 96" high= 1 shelf
- Tall Oven 108" high= 2 shelves

## REVEALS

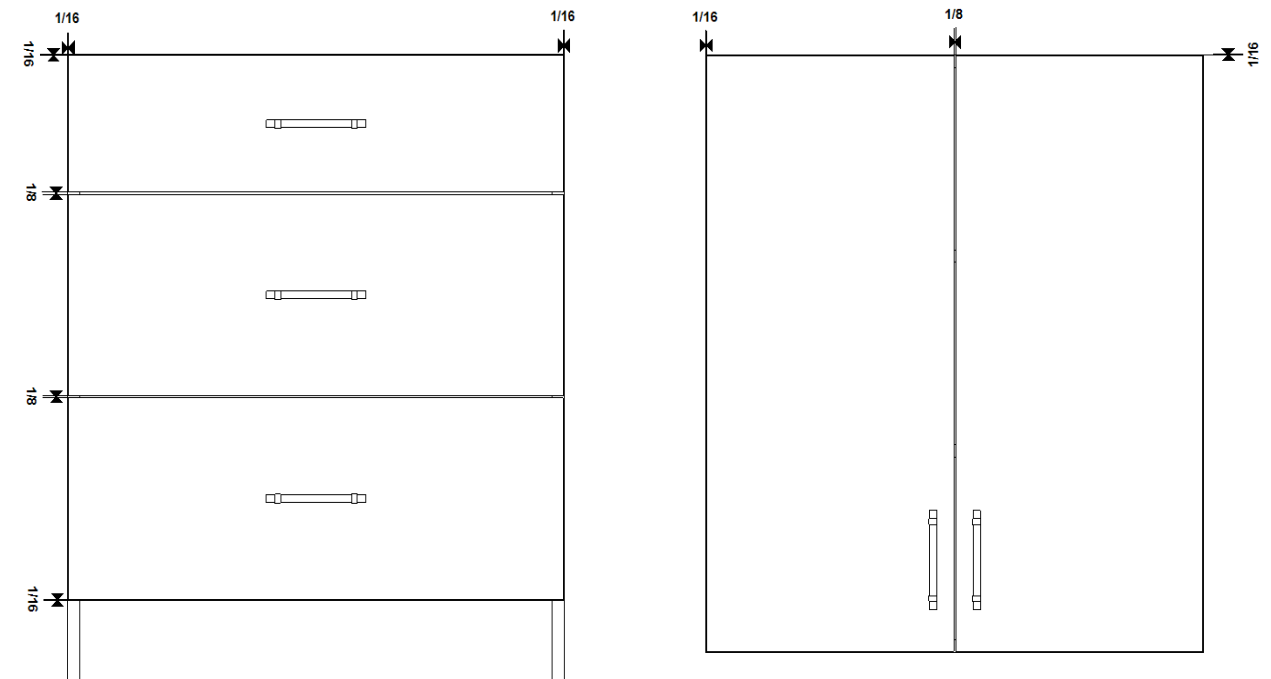

Roomaven cabinetry is engineered with a minimalist aesthetic and precision-tight reveals to achieve a seamless, contemporary appearance. Standard reveals are nominally 1/16" (.0625") on all sides and nominally 1/8" (.125") at paired door and drawer gaps.

These reveal dimensions represent design intent and may vary slightly based on installation conditions and material characteristics.

To maintain these precise tolerances, all doors and drawers must be properly adjusted after installation. **Final alignment is the responsibility of the customer and/or the cabinet installer.**

Cabinetry must be installed level and plumb. Improper installation may cause racking or twisting of the cabinet box, which can negatively impact reveals, alignment, and overall door and drawer performance.

Due to the natural characteristics of wood—including expansion and contraction resulting from environmental conditions—a variance tolerance of  $\pm 1/16"$  (.0625") should be expected on doors, drawer fronts, panels, and fillers. Variations within this range are considered normal and do not constitute a manufacturing defect.

# CABINETS LIMITED WARRANTY

Roomaven cabinetry is warranted to the original residential purchaser to be free from defects in materials and workmanship under normal residential use for as long as the original purchaser owns the home in which the cabinetry was installed.

This warranty applies to cabinet boxes, doors, drawer fronts, shelves, roll-outs, panels, and factory-installed components.

## 1. What Is Covered

Roomaven cabinetry is warranted against manufacturing defects that affect product function under normal interior residential use in a temperature-controlled environment.

If a defect is determined to exist, Roomaven, at its sole discretion, will repair or replace the defective component. Replacement parts may vary slightly in color, grain, or specification due to natural material variation or product updates. Labor, removal, re-installation, or transportation costs are not covered under this warranty and are the responsibility of the purchaser.

## 2. Environmental & Installation Requirements

This warranty applies only when products are:

Properly stored prior to installation  
Installed in accordance with accepted industry standards  
Used in interior, climate-controlled environments  
Maintained between 50°F–85°F with relative humidity between 30%–55%

Cabinetry installed near ovens, ranges, cook tops, dishwashers, steam ovens, or other heat- or moisture-producing appliances must include appropriate protective barriers, fillers, panels, or heat shields as required by installation standards. Failure to properly protect cabinetry from excessive heat or moisture exposure voids warranty coverage for related damage.

## 3. Natural Characteristics of Wood & Veneer

Wood and wood veneer products may exhibit variations in grain, color, texture, and expansion or contraction due to humidity. These characteristics are natural and are not considered defects.

Minor warpage within industry-accepted tolerances is not considered a defect.

## 4. What Is Not Covered

This warranty does not cover:

Normal wear and tear  
Finish aging, color changes, or sheen variation  
Damage from improper installation, misuse, abuse, or modification  
Damage caused by water leaks, flooding, excessive humidity, or standing water  
Heat damage from appliances not properly shielded  
Scratches, dents, impact damage, or job site damage  
Outdoor installation  
Labor, removal, re-installation, or transportation costs  
Consequential or incidental damages

## 5. Limitations of Liability

Roomaven's sole obligation under this warranty is limited to the repair or replacement of defective components.

This warranty is non-transferable and applies only to the original residential purchaser.

Liability shall not exceed the original purchase price of the affected product.

Additional rights may vary by state.

# CABINETS CARE AND CLEANING

Thank you for your decision to purchase Roomaven quality laminated products.

These products will bring you many years of quality performance. Everyday cleaning of our products is as simple as a wipe with a damp sponge or cloth. It is important to wipe up all spills and watermarks as they occur.

To clean the surface, use a damp cloth or sponge and a mild soap or detergent. Difficult stains such as coffee or tea can be removed using a mild household cleaner and baking soda; mixing to achieve a paste consistency. Use a stiff nylon bristle brush, scrubbing (approx. 15-20 strokes) the affected area. Do not scrub so as to mar (damage, scratch) the surface finish.

Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach or nail polish remover. Use a cotton ball saturated with bleach or nail polish remover (acetone), gently rub the stain for up to two minutes. Rinse thoroughly with warm water and wipe dry using a soft cloth. This step may be repeated if the stain appears to be going away and the color of the laminate has not been affected.

It is important to rinse the product surfaces with clean water after cleaning with any household chemical. Failure to rinse after cleaning is the single greatest cause of damage to a laminated surface. If even a small amount of cleaning solution remains on the surface, moisture from cups or dishes can reactivate it and result in permanently etched scars. Always rinse thoroughly with clean water and dry with a soft, clean cloth.

**WARNING:** Prolonged exposure of the laminate surface to bleach will cause discoloration. Always rinse laminate surfaces after cleaning! Failure to rinse after cleaning can cause damage; even if a small amount of cleaning solution remains on the surface. A dry residue may be invisible; however, moisture from cups or drinks can reactivate it, and result in permanently etched scars or stains over time.

Recommended Household Cleaners:

Windex Antibacterial  
Glass Plus

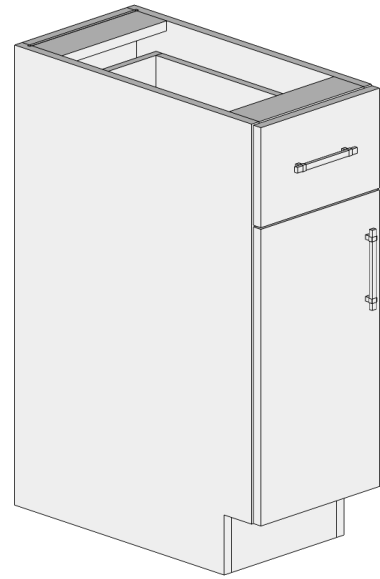

A Few Notes of Caution:

Acidic or abrasive cleaners can damage laminate surfaces; do not use them. Drain cleaners containing lye will permanently damage the laminate surface. If you spill a drain cleaner, wipe it up immediately and rinse several times with water. Hair, textile and food dyes can cause permanent stains. If dye should happen to spill, wipe it up immediately with dishwashing detergent or an all-purpose cleaner. Wipe spills away promptly and rinse several times with water.
