

Instructions for correctly setting up your Macro Security for Blind.Expert workbooks

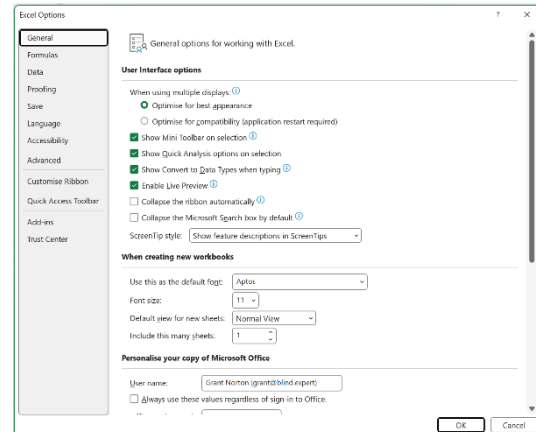

Introduction:

This document provides essential details required to ensure that Users correctly setup their PC for use with Blind.Expert workbooks.

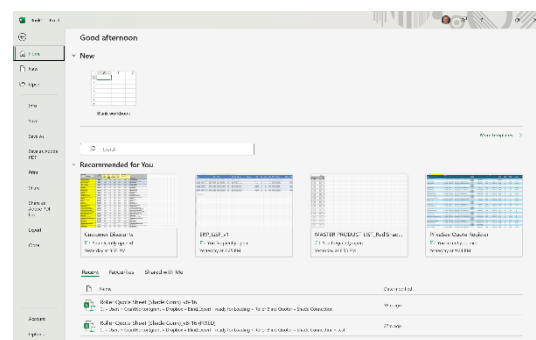

Step 1: Setup your PC Macro Security

All Blind.Expert workbooks use Macros to drive the key functionality that is provided by the various sheets within the workbook. In order for these Macro functions to correctly load and operate, the user must ensure that Macro security is correctly setup on their PC.

Click File at top left and you will see a screen like below, with “Options” appearing at the bottom Left.

Click Options and you will see the following dialogue box will appear

Click Trust Centre at the bottom of the list and you will see this screen.

Click Trust Centre Settings, then select Macro Settings

Finally, ensure the settings follow those shown to the right →

Congrats, your Macro Security settings are now all correctly set!
