

# We Need Your Help!

## Verify Your Service Line

The Town of Westerly, in partnership with Community Infrastructure Partners (CIP), has launched the EquiFlow Lead-Free Program to replace remaining lead service lines and update aging water mains over the next several years.

But before any replacement can happen, we must confirm which homes still have lead. That starts with verification—a quick step that helps ensure no lead is left behind in Westerly.

## How to Get Started

### Self-Verify Online

Use the self-verification tool on our website to confirm your service line material. It only takes a few minutes to complete the short form and upload a photo of your service line. The EquiFlow team handles the rest!

### Schedule an Appointment

Prefer an in-person check? Schedule a verification visit, and a team member will confirm your line material for you.

## Why Verification Matters

Verification is the most critical step in removing lead from Westerly's water system. Your participation helps:

- Identify where the remaining lead lines still exist
- Determine which homes qualify for replacement
- Keep construction planning on track for upcoming seasons

Replacing thousands of lead lines starts with one simple action: verifying your line. Your participation helps move both your home and the entire Westerly community toward a lead-free future

## Have Questions?

We are here to help! Contact us at (401) 315-4852, [infowesterly@yourcip.com](mailto:infowesterly@yourcip.com), or submit a question through the Contact Us form on our website. Our team will connect with us as soon as possible.

**Your verification is a small step that drives big progress for Westerly's water!**
