SUMMARY

Highly motivated and results-driven Full-Stack Web Developer with over 8 years of experience designing, developing, and maintaining scalable web applications and enterprise solutions. Experienced across modern frontend and backend technologies, with a proven track record of delivering high-quality software that enhances user experience and operational efficiency. Skilled in collaborating with cross-functional teams, leading technical initiatives, mentoring developers, and driving projects from concept to deployment in Agile environments.

EXPERIENCE

Web Developer

INVID

📅 04/2020 - Present

- Developed a scalable web application using Angular, ASP.NET, and MySQL for a major client, achieving 100% client satisfaction and directly contributing to the acquisition of a follow-up high-value project for the company.
- Lead a team of 4 developers and 2 QAs, fostering a collaborative environment and successfully delivering projects on time with little to no turnarounds from bugs or client changes.
- Optimized front-end side code of one of the company's internal applications in Angular, improving application performance by 25%.
- Mentored junior developers and led code reviews, improving overall code quality and consistency.
- Collaborated with UI/UX designers to build responsive, accessible and re-usable interfaces using Material UI and Bootstrap.
- Spearheaded the integration of third-party payment and authentication services (e.g., Stripe, Auth0), enabling secure, scalable e-commerce and user management.
- Acted as technical liaison between development and non-technical stakeholders, ensuring business requirements translated into effective solutions.
- Led company presentations to provide more knowledge to developer about different development tools like specific Angular features and CMS tools like WordPress.
- Optimized critical front-end performance metrics (LCP, CLS, FID) for company client websites, resulting in a 60% boost in Google Lighthouse scores and better SEO ranking.
- Implemented lazy loading, dynamic imports, and state management best practices, enhancing user experience on high-traffic pages.

Web Developer & Marketing Creator

Angros Creations

📅 05/2019 – 02/2020

- Led the development of multiple high-quality web applications for key clients, focusing on performance, usability, and conversion-driven design. Collaborated closely with stakeholders to deliver tailored solutions that increased client acquisition and retention for the company.
- Played a key role in developing marketing materials, including photo and video content, for both internal company branding and client campaigns. Contributed to enhanced brand visibility and engagement by producing visually compelling media aligned with strategic marketing goals

Software Developer

Knowledge Power Group

📅 06/2016- 12/2017

- Re-designed and improved performance for the company's main SAAS application. Improving the performance speed of the front-end application by more than 50%.
- Served as the lead developer for all CMS-related projects, including WordPress, Joomla, and Squarespace, consistently delivering fast turnarounds while balancing responsibilities across multiple company initiatives.

EDUCATION

Bachelor of Computer Science

University of Puerto Rico – Bayamon

08/2012 – 05/2017

PERSONAL PROJECTS

Proposal Management Web Application

Designed and developed a complete web platform for managing service proposals, quotes, and payments. Included a public website and a secure admin/client portal for seamless proposal creation, client approvals, and online transactions.

Stock Market Class Enrollment System

Built a web-based enrollment platform for managing stock market trading classes, allowing users to register, track classes, and manage payments through a personalized dashboard. Admins can oversee user activity, class schedules, and payment records from a centralized management panel.

KEY ACHIEVEMENTS

Lead Developer on Key Project

Directed a critical project for the Department of Health of Puerto Rico, which involved coordinating both front and back-end teams while delivering under tight deadlines.

Led Agile Turnaround for Delayed Project

Spearheaded the adoption of Agile practices as the appointed lead developer on a critical project that was falling behind schedule. Successfully restructured workflows, facilitated sprint planning, and improved team coordination—resulting in the project being delivered on time without compromising quality.

1st Place – INVID Internal Development Contest

Awarded first place in the company’s internal development competition by building a high-performing solution using INVID’s proprietary Angular/.NET Core framework, *AppCore*. Recognized for innovation, technical execution, and effective use of internal tools.

TECHNICAL SKILLS
