

The "Talking Head" Auto-Edit Engine

This workflow turns raw footage into a rough cut with music, b-roll, and branding in 4 minutes.

Phase 1: Asset Hunt.

(Nodes 1-18)

The bot searches Google Drive for the correct logos, fonts, and footage.

Phase 2: The "Brain".

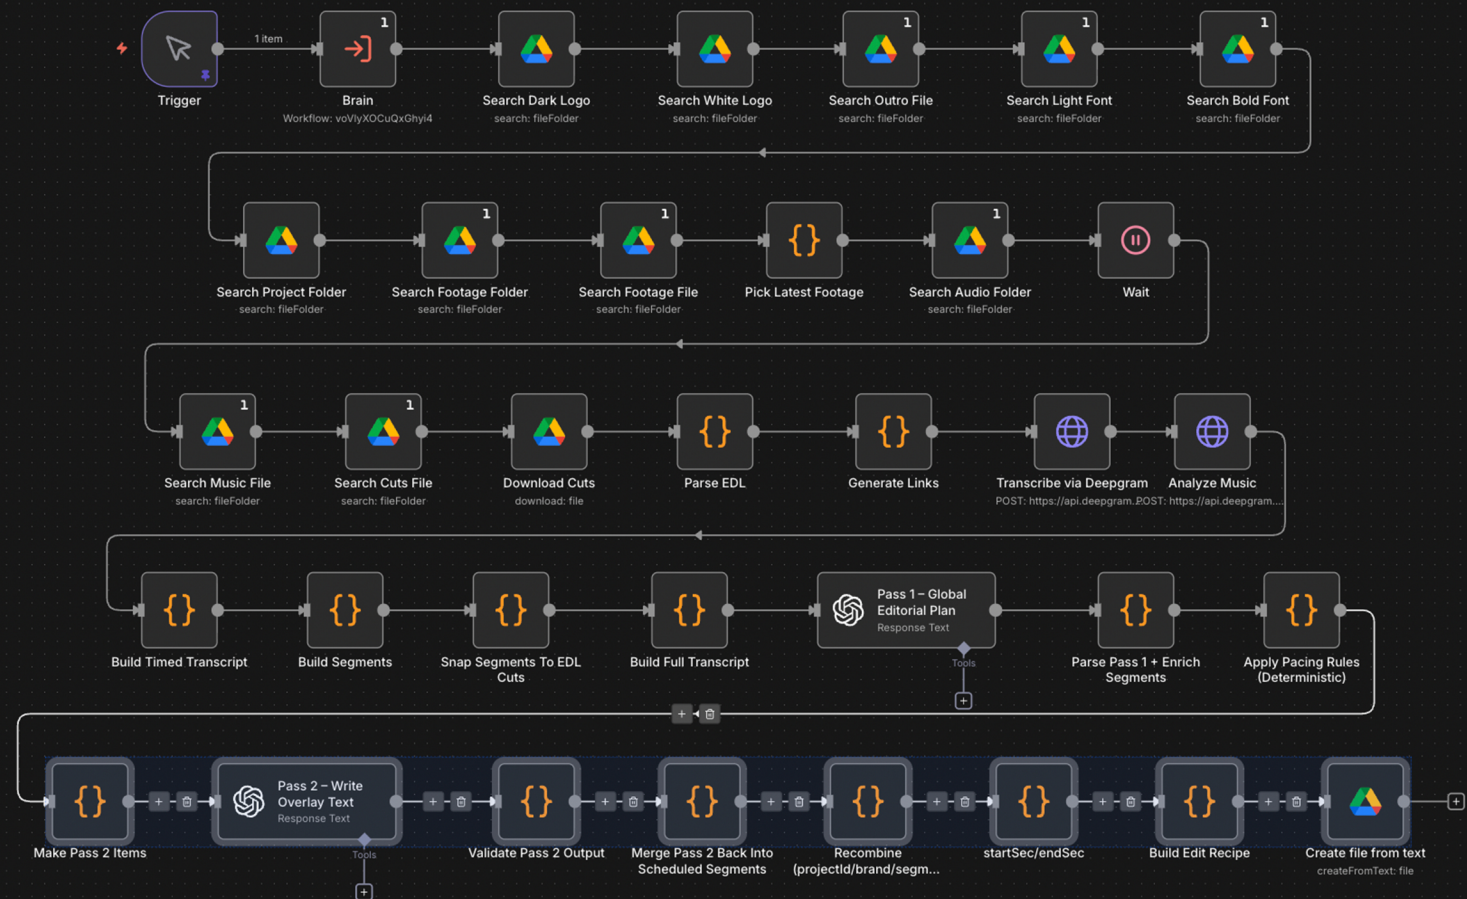

(Nodes 39-47)

Deepgram transcribes & analyzes the audio, and LLMs decide where to cut based on pacing rules.

Phase 3: The Recipe.

(Nodes 53-60)

The system writes a JSON file that After Effects reads to build the timeline instantly.

Don't have 200 hours to build this yourself?
