

FÆRCH PLAST

Europe's leading producer of packaging for ready meals

“ Færch Plast is focused on food safety, and that's why we are using the deCON 50 for super-cleaning of PCR bottle flakes. ”

HENNING SANDAL
COO FÆRCH PLAST

01 viscotec's deCON at visy industries

02 viscotec's deCON at Færch Plast

Færch Plast was founded in 1969 and is today Europe's leading producer of packaging for ready meals.

The company has approx. 500 employees working at three factories in Denmark, England, and the Czech Republic, as well as sales offices in France and the UK. The company, owned by the private equity fund EQT, is specialised in plastic packaging for the food industry and has enjoyed steady growth for the past many years.

viscotec's technology is supporting the business and market strategy of the leading packaging supplier perfectly. The important influence of viscotec's technology is reflected in the focus areas of Færch Plast.

Key values:

- Færch Plast is the most reliable and competent supplier of plastic trays for the European food industry.
- Wish to be known for our quality, credibility, accountability, and delivery performance.
- Will supply innovative and optimum solutions that combine our high-tech skills within tooling, processing, and material technologies.

Focus Areas

The five focus areas bring together the many aspects of CSR and create a clear overview of the CSR activities carried out by the company. The focus areas cover issues that are relevant now and which Færch Plast believes will grow in importance and require greater attention in the years to come.

Recycled plastics

Færch Plast believes the use of recycled plastics is a natural part of the company's sustainable production process. The use of recycled plastics is extremely important to the environment, since it means that Færch Plast's CO₂ emissions are significantly reduced. The company provides customers with a very high-quality and sustainable product that complies with all relating legislation and standards

Food safety

Færch Plast always ensures a high level of food safety for consumers. Færch Plast complies with statutory regulations and complies with regulation 10/2011. The company carries out several different inspections of the product and implements hygienic procedures directly related to people's interaction with production.
