Introduction

Antura Document Utilities (ADU) allows for ease of use when working with documents in Antura file archive. It is a program that helps when edititing a document in Antura' file archive. This program is developed and signed by Antura.

ADU needs to be installed on all clients (user's computers) that want to use the program. One installation can work with for several instances of Antura.

ADU is not needed when working with or editing documents in Antura, but it reduces the number of clicks needed to download, open, save, and upload the document.

System requirements

.NET Framework 4.8 needs to be installed on the client computer.

ADU is tested with works with the following browsers:

- Edge (latest version)
- Firefox (latest version)
- Chrome (latest version)

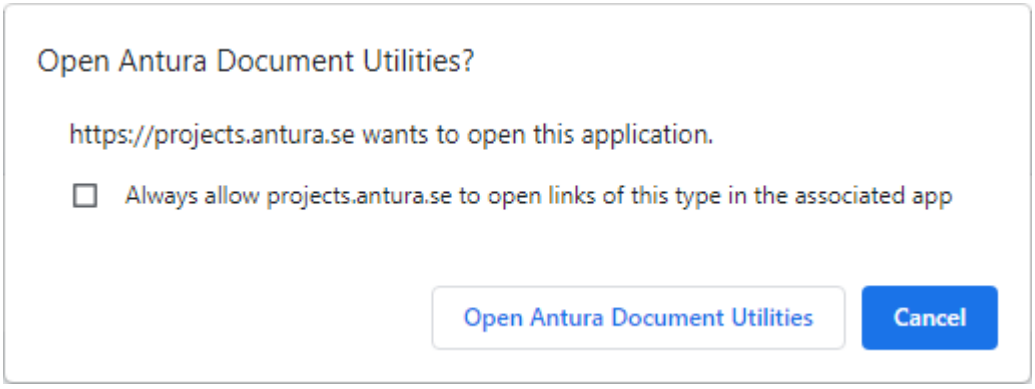

ADU is tested with and works with the following operation systems:

- Microsoft Windows 10
- Microsoft Windows 11

Custom URL protocol

Antura Document Utilities register a custom URL protocol: "savetoserver:"

This tells browsers that they can open the associated program when opening links starting with this protocol. A browser will not open a link without warning the user first. This example is from Google Chrome:

Windows Installer (MSI)

Antura Document Utilities are delivered as a Windows installer, also known as MSI. It can be silently installed to be able to deploy throughout an organization.

Access to Antura Document API

The local application *SaveToServer* accesses the Antura instance through a cryptographically secure 768 bit time limited key that allows for access to the Antura Document API.

Restricted to a temporary folder

For security reasons Antura Document Utilities may only write and read to and from a temporary folder that is erased after use.

File types that may be opened

When starting an associated application for editing a document the file is opened. For security reasons SaveToServer only opens the following file types:

doc, docx, docm, dwg, ifc, pdf, ppt, pptx, txt, vdx, vsd, vsdm, vsdx, vsw, xls, xlsm, xlsx.

Quality and trustworthiness

The code for Antura Document Utilities has been developed by Antura with the same rigorous routines used for delivering the Antura web application following our ISO27001 certified process. This procedure includes code review, security analysis and penetration testing.

By owning the entire process from code to delivery Antura can ensure the quality of its product.

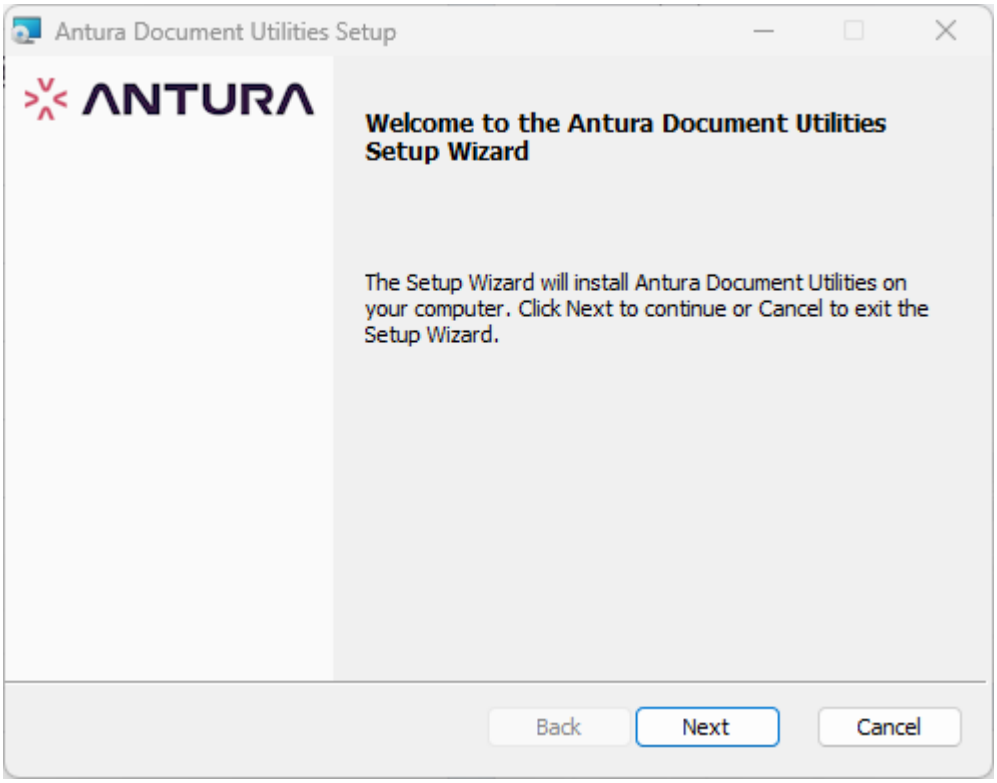

Appendix A: Installation guide

1. To get the MSI-package that installs ADU you can download it from Antura My place – Settings by clicking this button.

   

   The MSI package is also available for download on Antura' public page: https://projects.antura.se/Views/ProjectPlace/Public.aspx?Site=565118

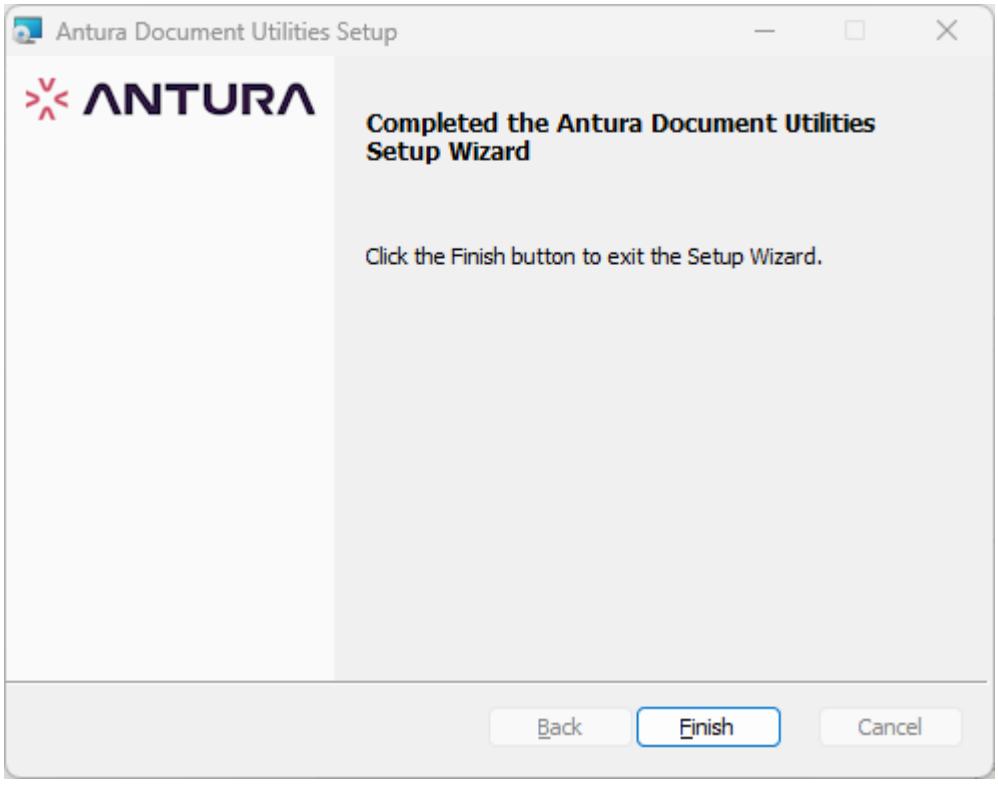

2. Run the MSI-package “antura-projects-document-utilities.msi”.
3. Click Next to start the installation.

1. During the installation, depending on if User Account Control is active or not, Windows may prompt the user to accept the ADU installer to make changes to the computer.

1. After the installation click Finish to finalize the setup.

2.

To simplify the installation of the MSI-package your internal IT can distribute the package using your organizations preferred practices. It should be noted that it's possible to install the package in silent mode using the following parameters:

msiexec /qn /i antura-projects-document-utilities.msi

Upgrade

To be upgrade ADU you will need to download the new MSI-package and install it for all clients that needs to be upgraded.

The version of the downloaded MSI-package will always be compatible with the same version of Antura.

If a new version of Antura is released you might need to upgrade ADU.

Appendix B: Frequently Asked Questions

Must all clients (user's) have ADU installed on their computers?

No, but those that wish to take advantage of the easy of use of ADU needs to.

Can we install the MSI-package before an Antura Technician enables ADU in our Antura?

Yes.

Does ADU work with all browsers?

No, ADU does not work with Safari as ADU uses .NET Framework and Mac OS does not support .NET Framework.

Does ADU cost anything extra?

No, ADU is a part of Antura and doesn't cost anything extra. Please keep in mind that any work related to configuring and potentially troubleshooting ADU will be charged as a normal support case.

If I upgrade Antura version, do I need to update ADU version?

We always recommend that you update version of ADU to the latest one.
But if we do not explicitly inform that an update will the required, old versions of ADU and Antura will be backwards/forwards compatible.

How do I install ADU if I'm not an administrator on my computer?

You need to contact your local IT support who can install this on your computer.
