

**UltraSkin™**

## Challenge

Not all skin packaging lives up to its premium look. Some films wrinkle or shrink unevenly. Others seal too aggressively and tear instead of peeling. These small flaws turn a great product into a questionable one — at least in the eyes of the customer.

## Solution

UltraSkin™ delivers a smooth, second-skin fit — no wrinkles, no distortion, just clean visibility and protection. Its easy-peel function improves usability, while universal sealing across common substrates simplifies production with no special coatings required.

**High-barrier skin vacuum film for meat, cheese, seafood, and ready meals with excellent transparency, versatile sealing compatibility, and easy-peel functionality**

### Precision Fit, Every Time

- | Shrinks tightly and evenly around complex shapes
- | No wrinkles, edge lift, or film distortion
- | Maintains product position and protection throughout the supply chain

### Seals That Simplify

- | Universal sealing to PET, PE, paper, aluminum, and others — no special coatings needed
- | Consistent seal integrity without added complexity
- | Easy-peel opening enhances consumer experience

### Shelf-Ready Impact

- | High transparency and gloss for premium product visibility
- | Clean, second-skin appearance that reinforces quality perception
- | Reduces pack rejections and improves retail presentation
