

Compound™ FlowPack

Challenge

In the retail fridge, appearance is everything. But wrinkled film, loose seals, or fogged surfaces instantly make customers hesitate — even if the product inside is perfect. Packaging that should build trust ends up breaking it.

Solution

Compound Flow Pack™ delivers speed, hygiene, and shelf appeal. It runs cleanly on high-speed lines and forms tight, protective seals — with excellent visibility and printability to ensure your product looks as good as it performs.

Tight, hygienic vertical sealing for high-speed lines — ensuring freshness, visibility, and product protection

⌚ Performance That Keeps Pace

- | Engineered for high-speed horizontal flow wrapping lines
- | Reliable sealing strength to reduce rework and product waste
- | Stable film behavior that maintains performance across portion sizes
- | Supports clean, hygienic packaging with minimal line interruptions

⌚ Efficiency Without Compromise

- | Optimized for automated loading and fast production cycles
- | Flexible format options for individual units or multipacks
- | Reduces downtime with consistent machine handling
- | Easy to integrate into existing flow wrapping setups

🏷️ Presentation That Sells

- | High clarity for strong on-shelf visibility
- | Smooth, wrinkle-free finish for a clean retail appearance
- | Custom print options to elevate your brand presence
- | Designed to support premium positioning in crowded displays
- | High transparency for strong product visibility on shelf
