

PROTECT YOUR HAVEN

By: **OREPAC**

FIRE RATED PRODUCTS

What is FRTW?

Fire-Retardant-Treated Wood (FRTW) gives you the natural beauty of real wood with the added confidence of built-in fire protection. Each board is pressure-treated with advanced fire-retardant technology that helps slow flames, reduce smoke, and protect what matters most.

Why Does This Matter?

Haven products are treated and labeled for exterior service to meet or exceed IBC 2303.2 which is suitable for WUI zones. Our best-in-class product exceeds ASTM E84 and ASTM E2768 requirements and has passed accelerated weathering to meet and exceed ASTM D2898.

COMPLIANCE	
IBC 2303.2	ASTM E2768 (E84 30-minutes)
IWUIC 503.2	ASTM D2898 ("800-inch rain")
US Navy QPL MIL-L-19140E	CAL FIRE #2520-1450:0502
