BLUE STAIN PINE

Blue Stain Pine showcases unique blue-gray tones and natural grain variation that add instant character. Its warm, organic look suits both rustic and modern spaces, and its lightweight, workable nature makes it ideal for impactful interior use.

Applications: Cladding, siding, paneling, and trim.

Hardness (Janka)

460 lbf (2046 N)

Environmentally Friendly

This tree is native to western North America and sourced from well-managed, certified pine forests. Its distinctive blue staining is a natural, non-structural fungus that gives the wood its unique character.

Golden Mesa

A sun-kissed wood tone blending honeyed gold with soft amber. Inspired by mesas at sunset, it strikes the perfect balance between rustic authenticity and modern sophistication, bringing warmth and depth to any design.

Coastal Drift

Capturing the weathered elegance of wood worn by the sun, salt, and sea. Muted, soft-toned color inspired by driftwood resting on the sand, it balances warmth and coolness, making it versatile across modern and rustic styles.

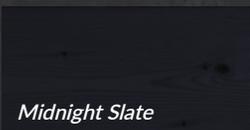

Summit Ridge

Like a mountain summit, it represents resilience and durability. It's rich oak character with a balanced, versatile finish, is inspired by the high ridgelines that define mountain horizons. Highlights of sun-warmed timber with natural grain for authenticity.

Canyon Ember

The rugged beauty of deep canyons illuminated by glowing embers at dusk. A deep, earthy wood tone infused with warm hints of burnt sienna, russet, and char. Inspired by firelight reflecting against canyon walls, it blends natural strength with an inviting, dramatic warmth.

Midnight Slate

The quiet strength and elegance of nightfall. With deep, cool undertones, it reflects the balance of stone and shadow. Inspired by moonlit basalt rock, it blends depth and refinement. Bold but not overpowering, it's subtle charcoal tones blend beauty with natural sophistication.
