# Together, let's make a world of difference.

We're doing our part to build a better world, every chance we get. Therma-Tru® Thrive is our commitment to make safe and sustainable products, support the communities where we live and work, and leave a positive, lasting impact on the environment.

## HELPING TAKE CARE OF OUR PLANET

Across all our facilities, we're finding innovative ways to reuse waste materials and expand our recycling efforts.

5+ years on the leading edge of the industry, **reducing harmful chemicals** from our PrismaGuard® paints and stains.

Therma-Tru is proud to be **recognized as the 2025 Brand Leader<sup>2</sup>** by *Green Builder* magazine for offering durable, well-insulated products.

Therma-Tru is proud to partner with Yellowstone Forever, the official nonprofit partner of **Yellowstone National Park**.

## BEING A GOOD NEIGHBOR

For over 40 years, we've been proud to partner with 100+ local and national organizations to make a positive impact on the places we all call home.

**Building homes** for those in need with Habitat for Humanity.

**Providing entryways** for our nation's wounded vets with Jared Allen's Homes for Wounded Warriors.

**Hosting blood and donation drives** to support the American Red Cross.

## Awards

Veris entryway systems have been recognized by *Green Builder* as a cutting-edge solution that enhances energy efficiency, resilience and sustainability in homes; and by *Architizer* for quality, performance and design impact.

Veris Modern Grain entryway systems received recognition as a winner of the 2025 Product Innovation Awards, published by *Architectural Products*, for outstanding innovation.

We are proud to be an official corporate partner of Yellowstone Forever's sustainability initiative to help ensure that Yellowstone National Park remains for generations. We're proud to provide fiberglass entryways for Yellowstone Park employee housing.

<sup>1</sup>Comparison of fiberglass to wood doors (both without glass).  
<sup>2</sup>Brand Index, 2025 *Green Builder* magazine.

# Where style meets serenity.

Today's design trends invite you to create a relaxing retreat that reflects your home's unique style. Whether you're drawn to nostalgic charm, timeless elegance or laid-back luxury, we offer the products that will help turn your home into a haven.

## MODERN HARMONY

NOSTALGIC | INDUSTRIAL | ORGANIC

Retro styles meet nature-inspired influences as Modern homes lean into lighter hues, warm wood grains and mixed textures.

### FEATURED PRODUCTS:

*Modern Grain Pivot door with Satin glass in PrismaGuard Acorn*

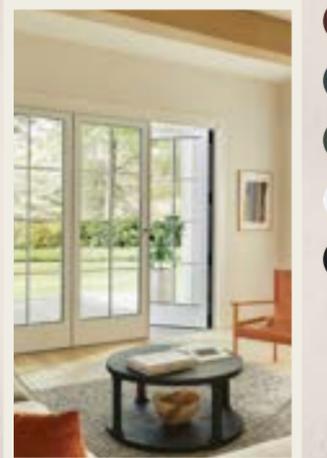

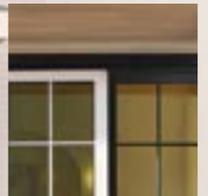

## BALANCED BLEND

CRAFTED | TEXTURAL | WELCOMING

The new Casual aesthetic features trend-forward colors and finishes in perfect harmony with elevated-but-comfortable details like vertical textures and eased edges.

### FEATURED PRODUCTS:

*Sliding doors in Dark Bronze*

## WELL TAILORED

DECORATIVE | TRANSITIONAL | REFINED

Traditional homes blend European-inspired elements with tailored details, including mixed wood grains and a moody color palette, for a fresh take on Old World style.

### FEATURED PRODUCTS:

*Folding doors with SDL bars in White / Black*

# Movement with Purpose

Explore a variety of operational methods to connect with the outdoors through expansive glass panels that easily glide open and shut.

## PIVOT ENTRY DOORS

The epitome of modern style with unique movement. Features a pivot point at the top and bottom of the door instead of along the edge.

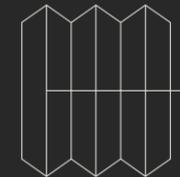

More on pages 22–33.

## HINGED GLASS DOORS

Ideal for homes with contemporary styling. Available in single and french door configurations for a simplistic look in the front or back of the home.

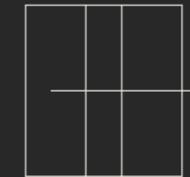

More on pages 34–45.

## FOLDING GLASS DOORS

Perfect for connecting indoor and outdoor spaces in homes with patios, decks, enclosed porches and more. Optional swing door allows for easy entry or exit without opening all the panels.

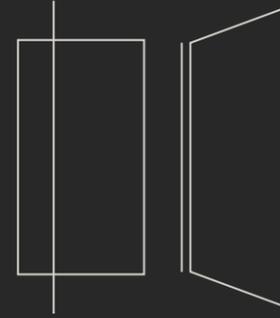

More on pages 46–57.

## SLIDING GLASS DOORS

Enjoy expansive views and easy access to outdoor living spaces. Optional pocket door construction can deliver completely unobstructed views when fully opened.

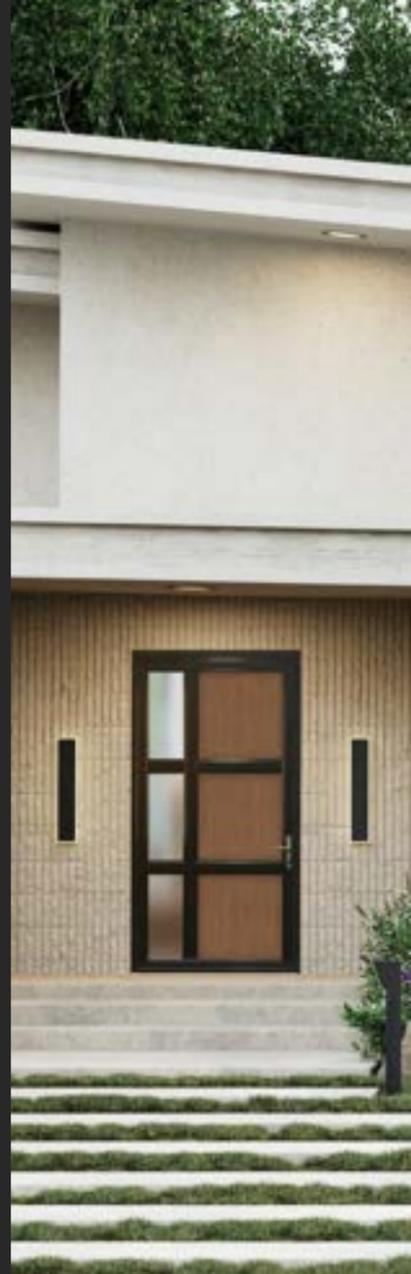

More on pages 58–69.

**NEW MODERN GRAIN ENTRY DOORS**

# Luxury meets function.

Designed to harmonize with your home and enhance your way of living, new Veris Modern Grain entryway systems blend the best of both worlds — sleek glass and aluminum with warm, true-to-wood Walnut-grained fiberglass panels.

## Confidence in a Complete System

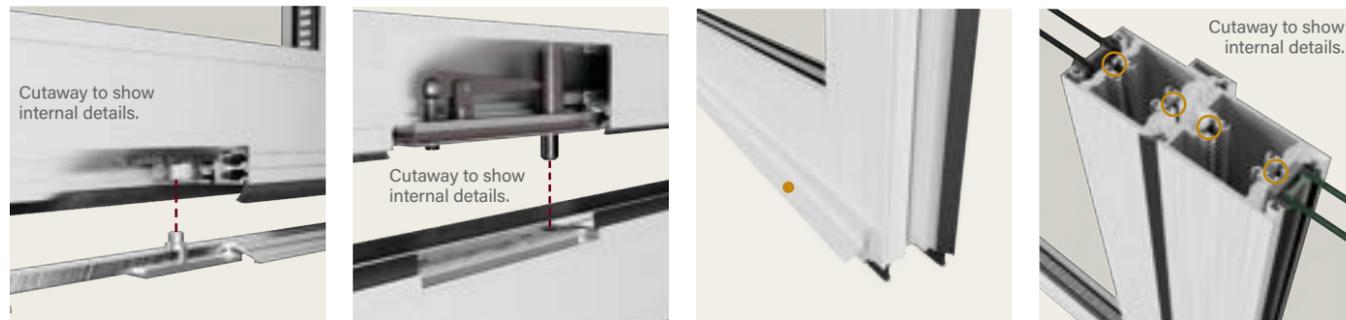

Create the ultimate open-air living experience with superior performance thanks to our full-system approach.

**PIVOT** | Pivot component images shown from interior side of the door system.

A **door limiter** holds the door open while blending into the system. A rubber stopper provides quiet operation.

In addition to the **deadbolt**, the **flush bolt**<sup>1</sup> offers another locking point and is integrated into single and french configurations for added security and enhanced performance in severe weather.

**Pivot hardware** delivers the innovative movement of the pivot door with a **sealed bearing** on the bottom for smooth, quiet operation.

Built-in **rain deflector** helps protect areas exposed to wind-driven rain, enhancing weather protection.

**Thermal break design** separates interior and exterior aluminum to reduce heat and cold transfer between indoors and outdoors which helps reduce condensation.

Designed to provide the best possible fit between panel and frame, the **weatherstrip** helps prevent water and air from entering the home.

**Thermally broken sills** reduce the transfer of heat and cold through the door system for greater energy efficiency while reducing condensation buildup. Available in a flush configuration for ADA compliance.<sup>2</sup>

As part of french door configurations, an **astragal** is integrated into the unit to assist with sealing the door system for better protection from the elements.

Adjustable roller latch ensures the door stays shut (for Inspira and Verge handlesets only).

**HINGED** | Hinged component images shown from interior side of the door system.

Standard Inswing

Standard Outswing

Flush<sup>1</sup>

**Thermally broken sills** reduce the transfer of heat and cold through the door system for greater energy efficiency while reducing condensation buildup.

Sills are available in **standard** for water performance and **flush** for ADA compliance.<sup>2</sup>

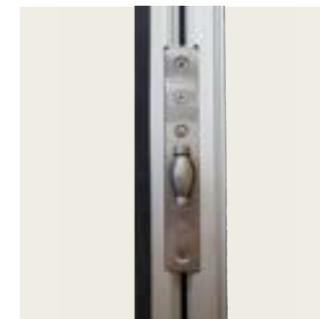

**Semi-concealed hinges** built into the panels blend with the door system. Manufactured in-house to high tolerances under tight quality control. Color-matched options are available.

Designed to provide the best possible fit between panel and frame, the **weatherstrip** helps prevent water and air from entering the home.

**Thermal break design** separates interior and exterior aluminum to reduce heat and cold transfer between indoors and outdoors which helps reduce condensation.

As part of french door configurations, an **astragal** is integrated into the unit to assist with sealing the door system for better protection from the elements.

Adjustable roller latch ensures the door stays shut (for Inspira and Verge handlesets only).

<sup>1</sup>French door systems and 10' door systems will include flush bolts.

<sup>2</sup>Door systems built with a flush sill have little resistance to water penetration and have a potential to leak if installed exposed to weather. We recommend these systems be installed away from weather under large soffits or overhangs. For ADA compliance, the door must provide a minimum 32" clear opening width. Verify all other ADA compliance requirements with your local building code official.

V-3

**V-3 SYSTEMS:**

**Performance where you need it.**

Our V-3 systems are engineered to meet the high-performance needs of specific regions, building codes and commercial structures, and are built to support larger glass panels found in our taller units. With high-performance components that can stand up to heavy-duty use, the V-3 system is ideal for structures and door units that require extra support and stability.

**Panel & System Thickness: 3"**

- Clear Anodized
- Dark Bronze Anodized

<sup>1</sup>Door systems built with a flush sill have little resistance to water penetration and have a potential to leak if installed exposed to weather. We recommend these systems be installed away from weather under large soffits or overhangs. For ADA compliance, the door must provide a minimum 32" clear opening width. Verify all other ADA compliance requirements with your local building code official.

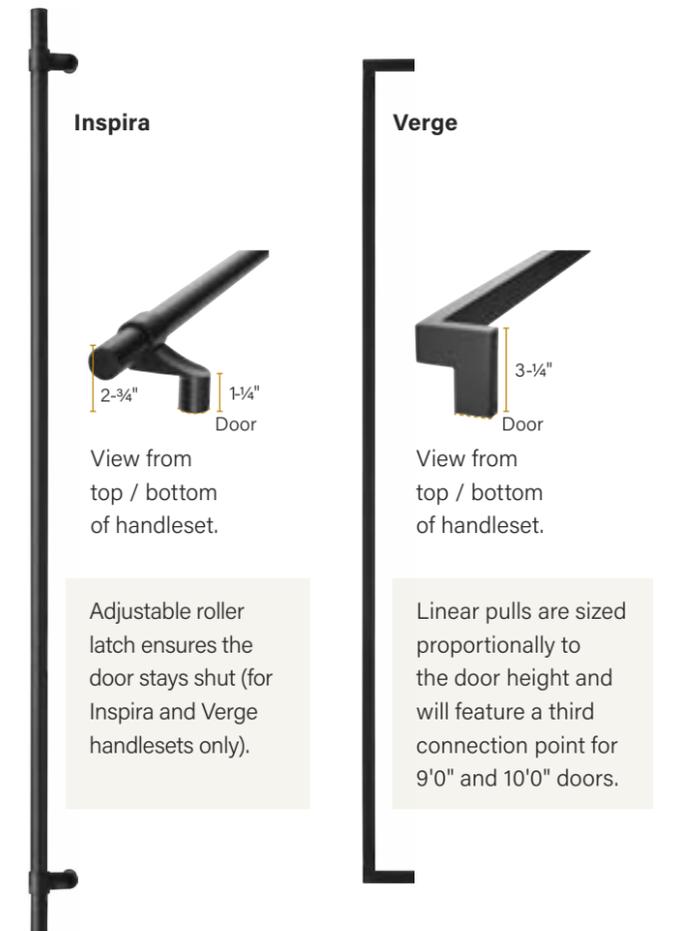

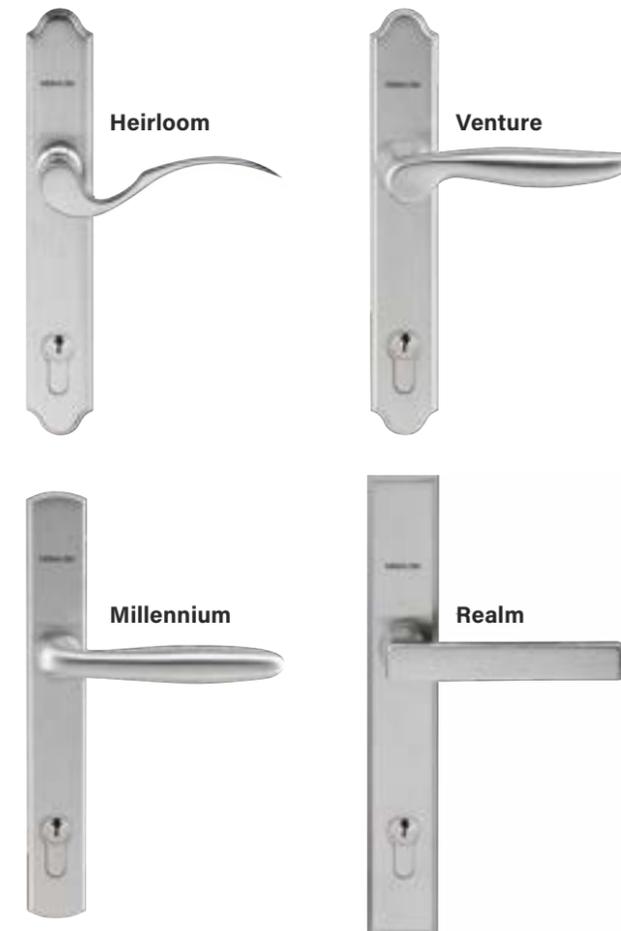

Note: Finish colors may vary from an actual application due to fluctuations in finishing or printing. See your Therma-Tru seller for details on the Veris limited finish warranty and exclusions.

## Handlesets

Active handlesets come standard with thumbturn interior lock with keyed exterior.

The multi-point locking system engages the panel and frame at three points for enhanced security while helping to preserve the compression seal's hold, even under the pressure of high winds.

Inspira and Verge handlesets deliver the minimalist style of a modern door pull. The handles are partially offset from the rail for comfortable access to the lock. The lock features an interior thumbturn and exterior keyed options. French door systems and 10' door systems will also include flush bolts.

Recessed Standard

Recessed Flush<sup>1</sup>

**Thermally broken sills** reduce the transfer of heat and cold through the door system for greater energy efficiency while reducing condensation buildup.

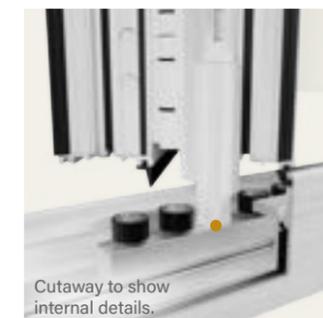

Install as a **standard** or **recessed standard sill** for better water resistance, or a **recessed flush sill** for a seamless appearance.

4

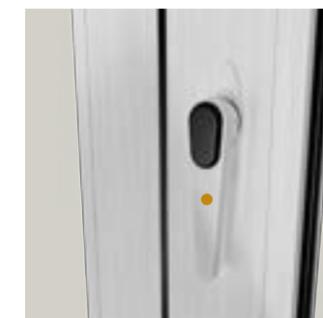

**Trolleys** carry the load of the door system from either the top or bottom of the assembly, depending on the hanging configuration. Assembled in-house with sealed precision ball bearings to help protect from dust and other debris for smooth and quiet operation.

5

Non-load-bearing **idlers** are designed to smoothly guide the door panels. Assembled in-house with sealed precision ball bearings to help protect from dust and other debris for smooth and quiet operation.

6

A **two-point lock** secures each panel against the compression seal for a tight bond. Designed for intuitive, ergonomic use while maintaining a low profile. Color-matched options are available.

7

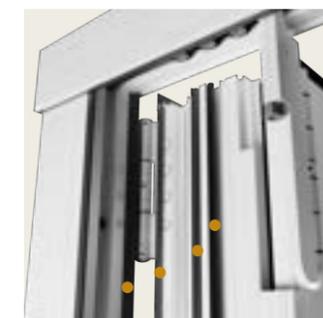

**Hinge pulls** offer an easy, low-profile way to close door panels on outfold systems while helping to keep fingers away from pinch points. Made in-house to high tolerances. Color-matched options are available.

8

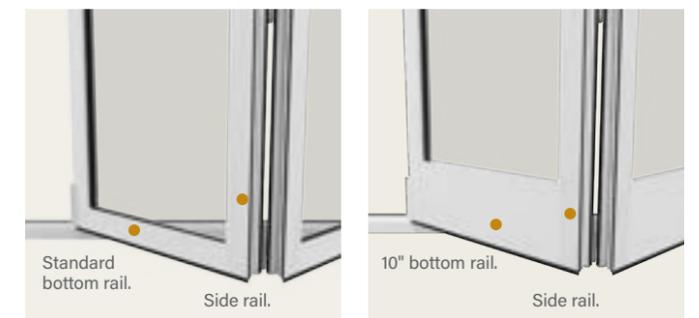

A **door catch** holds the door open. Made in-house for tight quality control. Color-matched options are available.

9

Designed to provide the best possible fit between panel and frame, **compression seals** help prevent water and air from entering the home.

10

**Top and side rails** are 3-3/8" wide, maximizing the view through each panel. Available with **standard bottom rails** that match the height of the top rail and width of the side rails or **10" bottom rails** which deliver the beauty of glass while meeting ADA compliance.<sup>2</sup>

<sup>1</sup>Door systems built with a flush sill have little resistance to water penetration and have a potential to leak if installed exposed to weather. We recommend these systems be installed away from weather under large soffits or overhangs.

4.8 <sup>2</sup>For ADA compliance, the door must provide a minimum 32" clear opening width. Verify all other ADA compliance requirements with your local building code official.

## V-2 vs. V-3

### V-2 SYSTEMS:

#### Built for everyday life.

Our V-2 systems are designed to meet the needs for most homes and structures. Featuring our standard components that are quality tested for long-term use, the V-2 system is perfect for residential dwellings in most areas of the United States.

**Panel & System Thickness:** 2-1/4"  
**Maximum Height:** 8'

### V-3 SYSTEMS:

#### Performance where you need it.

Our V-3 systems are engineered to meet the high-performance needs of specific regions, building codes and commercial structures, and are built to support larger glass panels found in our taller units. With high-performance components that can stand up to heavy-duty use, the V-3 system is ideal for structures and door units that require extra support and stability.

**Panel & System Thickness:** 3"  
**Maximum Height:** 10'

## SIZE OFFERING

Folding configurations with panels that exceed 8'0" in height will be built as a V-3 system.

System		2-Panel	3-Panel	4-Panel	5-Panel	6-Panel
Panel Width		3'0"	3'0"	3'0"	3'0"	3'0"
Height	6'8"					
	7'0"					
	8'0"					
	9'0"					
	10'0"					

Standard Lead Time

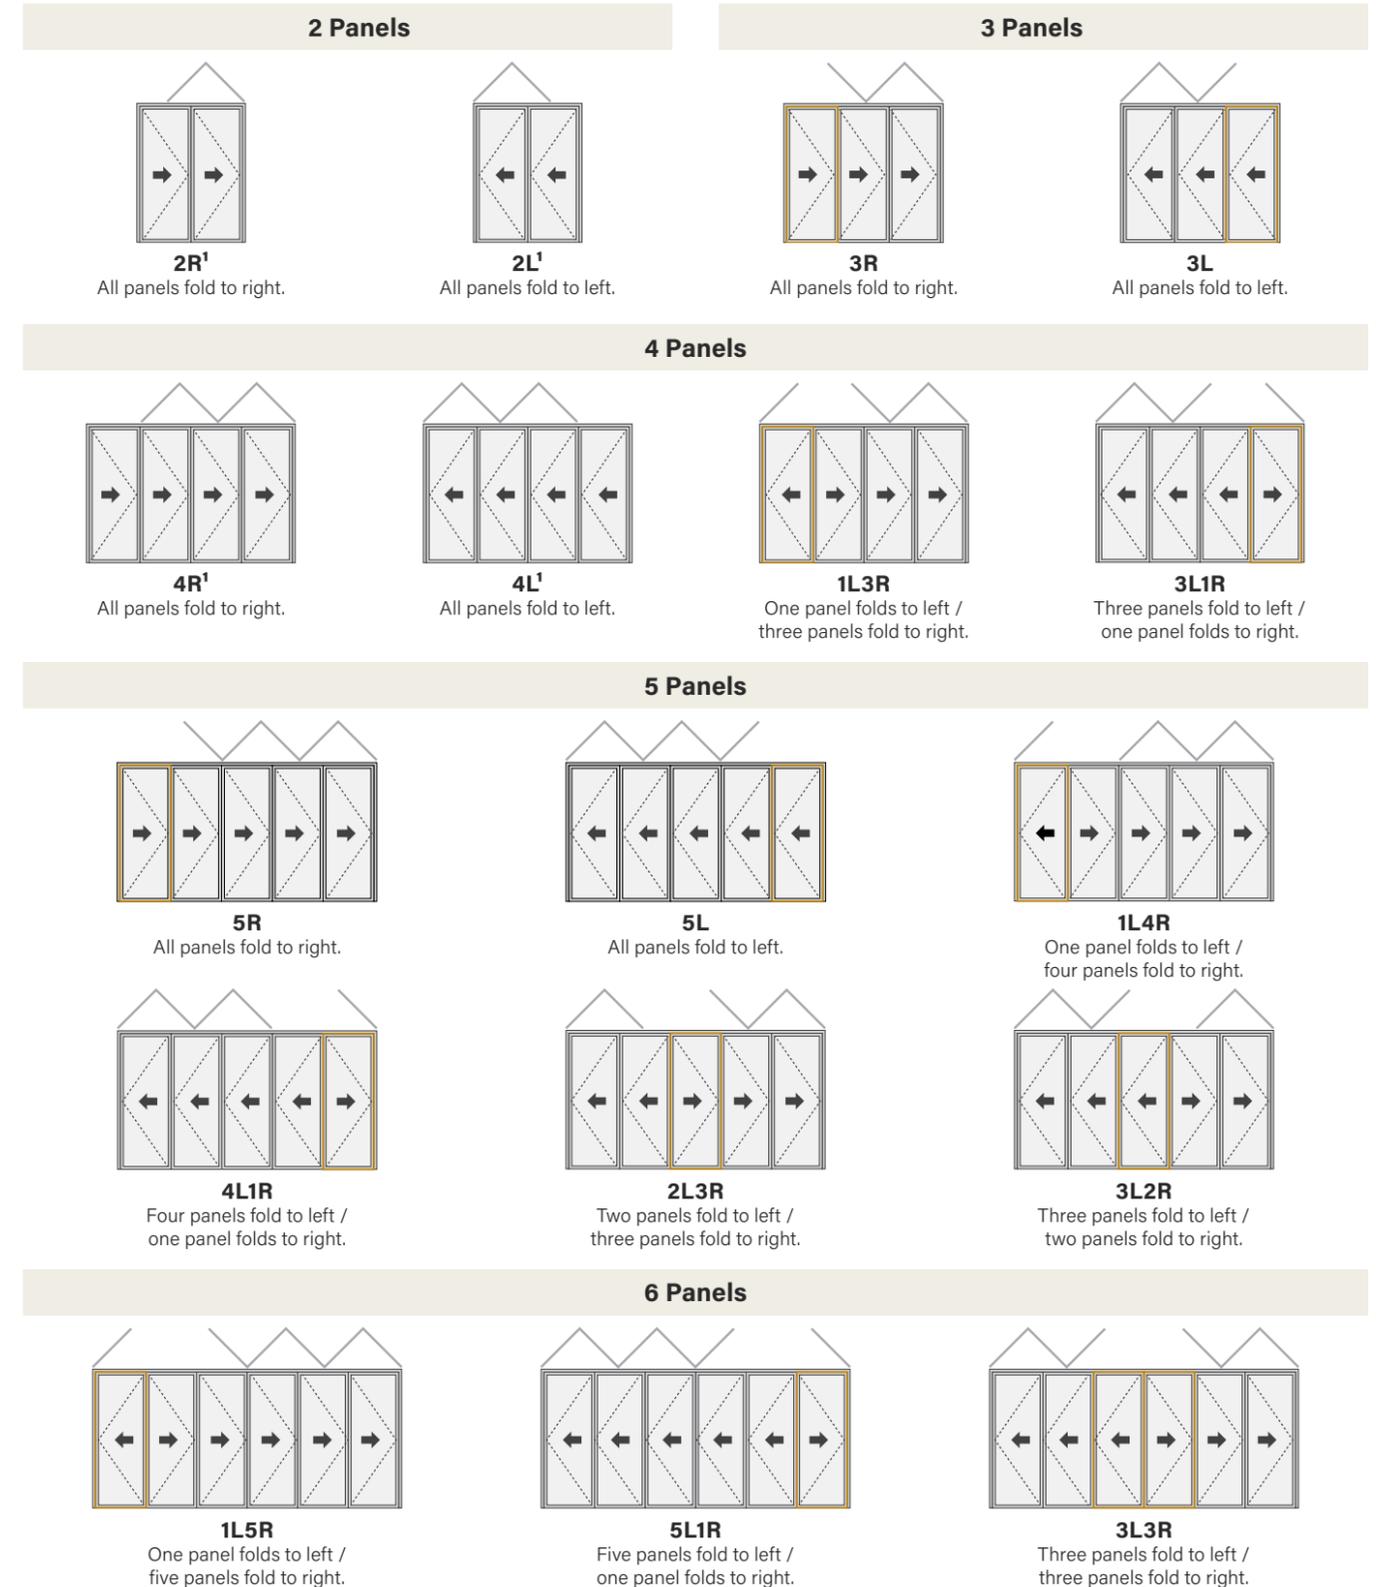

Extended Lead Time

<sup>1</sup>Operated from interior only (no exterior hardware).

## Configurations

Available as infold or outfold. Select configurations are available with single swing door operation for easy access to outdoor spaces without opening the entire folding unit. Look for the panels outlined in gold.

SHOWN FROM THE EXTERIOR SIDE OF THE DOOR SYSTEM.

## Glass Options

### Enhanced Low-E

Blocks 95% of the sun's harmful UV rays, helping to preserve the color and materials of your interior furnishings, draperies and wall treatments.<sup>1</sup>

### Low-E

Delivers exceptional energy efficiency, retaining heat in the winter and reflecting it in the summer.

### Turtle with Low-E

Tinted gray to reduce interior light projection as required near sea turtle nesting areas. Includes Low-E coating for exceptional energy efficiency.

### OPTIONAL NEAT+™ COATING

This low-maintenance coating is designed to help keep glass clear and free of watermarks, reducing the need for cleaning.<sup>1</sup> Available for all Low-E glass.

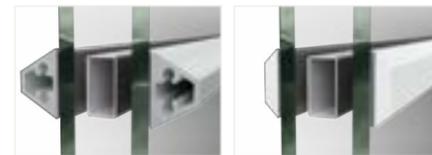

## DIVIDED LITES

### Available Patterns

### Simulated Divided Lites (SDLs) with Grilles Between Glass (GBGs)

SDLs are adhered to the interior and exterior panes of tempered glass and are finished to complement the door system. For a more authentic divided lite look, SDLs are layered over black GBGs.

**Traditional Profile**  
Height: 3/4"  
Depth: 15/32"

**Flat Profile**  
Height: 3/4"  
Depth: 5/32"

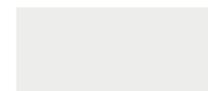

### Grilles Between Glass (GBGs)

GBGs are sealed between two panes of tempered glass for a smooth easy-to-clean surface.

**Height: 5/8" Depth: 3/16"**

### Finish Options for GBGs

White

Black

Split finish not available for GBGs.

## Screen Options by Genius

Welcome a fresh breeze into the home while keeping insects and debris out. Sheer screens glide open and shut with the touch of a finger and include convenient latching options at the center, right or left to best fit the home.

Screens are pre-assembled for fast and easy installation compared to other screens. For outfold systems, screens are installed on the interior side. For infold systems, screens are installed on the exterior side. Available in white and black.

Scan to learn more about screen options.

### ZIGZAG1 SCREENS

The ZigZag1 screen features one large panel of fabric and opens at either end. The screen can be moved from left to right and positioned as desired.

- Designed to fit standard openings.
- Maximum Height: 8'
- Maximum Unit Width: 12'

### ZIGZAG2 SCREENS

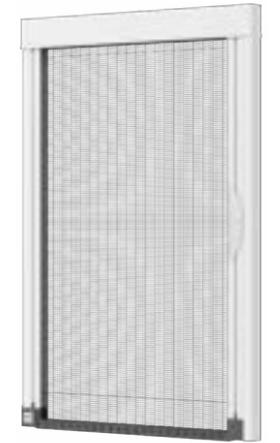

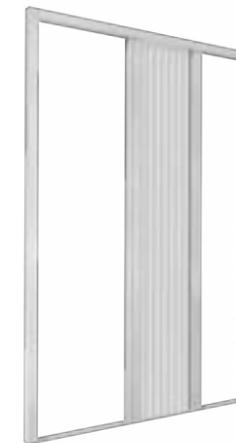

The ZigZag2 screen features two screen panels that meet in the center and stay latched using a full-length magnetic seal.

- Designed to fit standard openings.
- Maximum Height: 8'
- Maximum Unit Width: 12'

### SHEER CLASSIC SCREENS

- Designed to fit wide openings.
- Feature a thin flat bottom guide.
- Maximum Height: 10'
- Maximum Single Panel Width: 57-1/2"
- Overall Width Sized to Unit

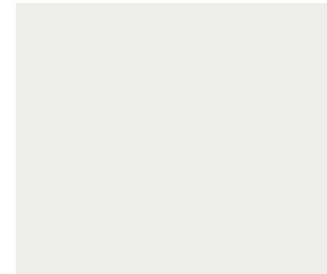

## Finish

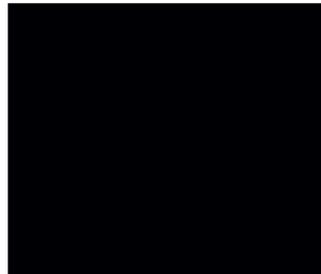

Choose from an on-trend assortment of finishes designed to complement most homes.

### POWDER COATED (STANDARD LEAD TIME)

Similar to semi-gloss finish.

White

Black

### ANODIZED (STANDARD LEAD TIME)

Similar to eggshell finish.

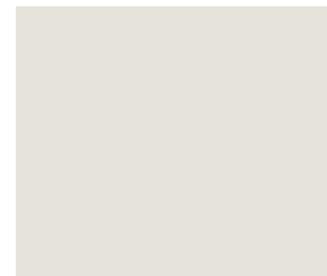

Clear

Dark Bronze

### POWDER COATED (EXTENDED LEAD TIME)

Similar to semi-gloss finish.

Bone White

Sandstone

Fashion Gray

Charcoal

### Additional Split Finish Options

Choose any two colors to create a split finish that complements the interior and exterior of the home. Available on extended lead time.

### Grilles Between Glass

White

Black

Split finish not available for GBGs.

White / Black

Request access to Entryway Developer Pro to order 3-1/4" x 4" finish color samples.

## Sills

Standard / Recessed Standard

Recessed Flush<sup>1</sup>

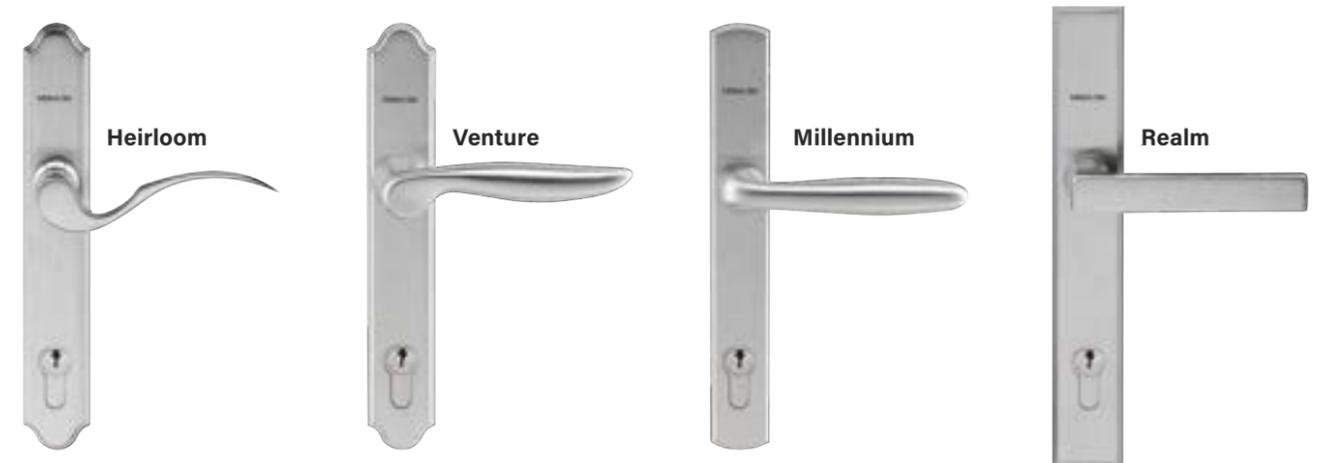

### Sill Finish Options

- Clear Anodized
- Dark Bronze Anodized

## Handlesets

Active handlesets come standard with thumbturn interior lock with keyed exterior.

The multi-point locking system engages the panel and frame at three points for enhanced security while helping to preserve the compression seal's hold, even under the pressure of high winds.

## SLIDING GLASS DOORS

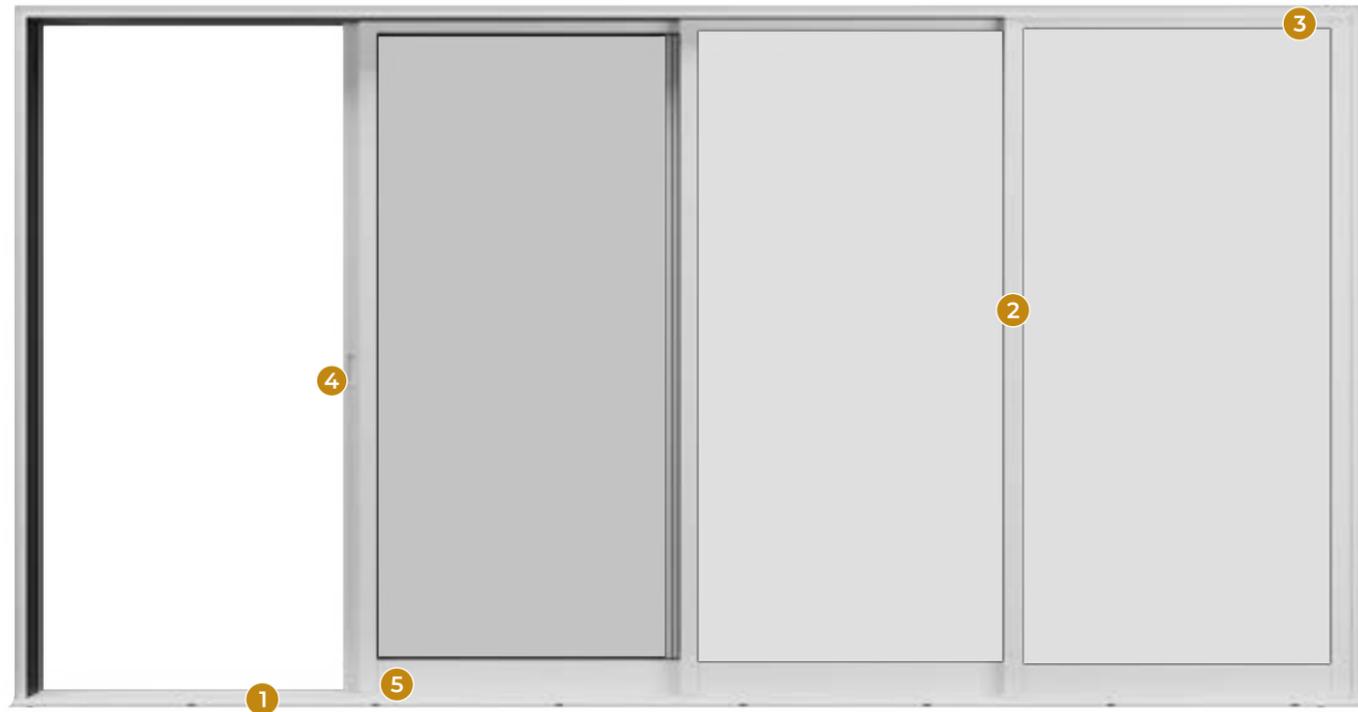

# Expand the living space.

Easily blend indoor and outdoor living spaces with Veris sliding glass door systems. Enjoy expansive views thanks to a flexible design with large panel sizes and multiple configurations. Options for built-in pocket doors deliver completely unobstructed views when fully opened.

# Confidence in a Complete System

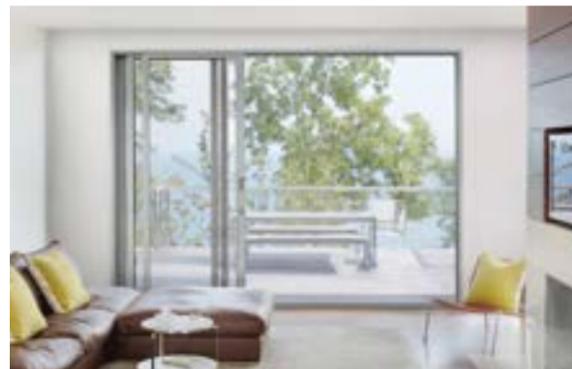

Create the ultimate open-air living experience with superior performance thanks to our full-system approach. With Veris™ entryway systems, each piece is engineered to work together seamlessly.

FULLY CLOSED

FULLY OPEN / NON-POCKET

1

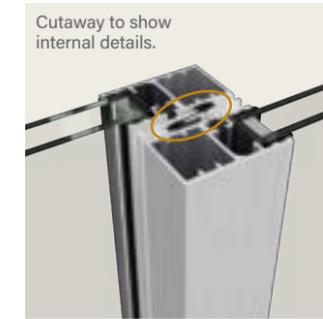

**Standard**

**Thermally broken sills** reduce the transfer of heat and cold through the door system for greater energy efficiency while reducing condensation buildup. Sills are available in **standard** and **flush** configurations.

**Flush<sup>1</sup>**

2

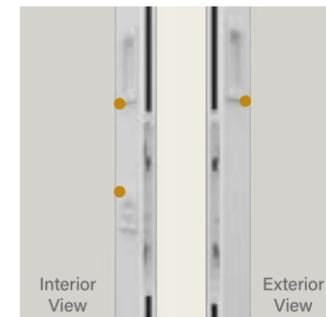

A **hook rail** seals the opening between two closed panels to keep out drafts and the elements.

3

Designed to provide the best possible fit between panel and frame, the **weatherstrip** blocks moisture and drafts from entering the home.

4

The **Recessed handle set** offers clean style and is made in-house for quality control.

5

Engineered for smooth operation, **polymer rollers** quietly move door panels with precision **ball bearings** for sustained durability.

As part of a pocket unit, the **edge pull** begins the movement of the door panels when they are open. Made in-house for quality control.

## IMPACT-RATED PRODUCTS

Therma-Tru offers Impact-rated doors and glass that can be used to meet high-wind and coastal region codes and regulations, offering excellent performance in extreme weather conditions while providing added protection.

Constructed to help protect the interior of the home from flying debris and high winds associated with tropical storms and hurricanes, these products are tested to meet codes and regulations in coastal regions, including parts of Florida, Texas and the Carolinas.<sup>1</sup>

<sup>1</sup>Product approvals show that the door system meets applicable codes when selected, assembled and installed as instructed.  
<sup>2</sup>Where resistance to water infiltration is required, these products must be installed in a sheltered location or under an overhang.  
 Note: Visit [verisollection.com](http://verisollection.com) for product approvals and installation instructions. Always confirm building code requirements in your area before buying. Follow weather and news reports to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.
