

## UV Fluorescence & Colorimetry

# Uvidoc HD6

The Uvidoc HD6 is our most popular imaging system for DNA/RNA UV gels. With an on-board touch screen, measuring 12.2", this imager provides unrivalled speed and user-friendliness by its 1-touch concept. Ideal for crowded labs where automation, ease of use and high-sensitivity are required.

**Dims** > Height: 730 mm - Width: 425 mm - Depth: 475 mm

**Weight** > With Transilluminator: 33 Kg - Without: 27 Kg

## Practicality

- ▶ **1-touch to image** > effortless acquisition, in no time
- ▶ **No manual control** > hands-off, automated routines
- ▶ **Fully slide-out tray** > hassle-free sample positioning
- ▶ **26x21cm FOV** > largest field of view for larger samples

## Optics

- ▶ **6 megapixels** > superb, publication-level images
- ▶ **65,535 gray levels** > research-level protein quantification
- ▶ **6x zoom lens** > responsive optics for a versatile imaging area
- ▶ **Passive cooling** > reduced noise for clearer images

## Applications

- ▶ **Uvipure technology** > enhanced UV for EtBr and all safe stains
- ▶ **Multi-functions** > optional screens for extended applications
- ▶ **3-position filter wheel** > up to 18 filters to choose from
- ▶ **Fully-customizable** > 100% adjustable parameters and protocols

## Darkroom

- ▶ **Stainless steel** > long-lasting, robust instrument
- ▶ **Customizable** > large choice of transilluminators
- ▶ **Giant 12.2" HD screen** > larger images, unrivalled ease of use
- ▶ **Real on-board computer** > way more powerful than tablets
