

Your Entire Technical Library, Instantly Searchable.

Komodo AI™ is secure, air-gapped *Document Intelligence* that turns equipment manuals, user guides, SOPs, and more into immediate, actionable answers via natural-language queries.

The Bottom Line: Komodo AI is a true **multiplier** for technicians and engineers. Get a dedicated **data vault** to protect your information with **zero hosting fees** and **no token limits**.

Features & Benefits

- **Immediate Troubleshooting:** Provides step-by-step instructions and exact CLI syntax.
- **100% Grounded Accuracy:** Responses are pulled strictly from your documentation—no internet searches, no hallucinations.
- **On-Box Mentor:** An interactive interface that acts as a digital expert for junior staff.
- **Custom Repositories:** Support for site-specific manuals, SOPs, and Operational Acceptance Tests.
- **Deep Context:** Provides highly aware, situation-specific assistance.
- Query Example: "How do I set an IP on an Extreme Networks VLAN?"

Technical & Security Benefits

- **Auditable AI:** Every query response includes direct citations from your document repository.
- **Air-Gapped Deployment:** On-premises architecture built for NERC CIP and nuclear environments.
- **Self-Contained:** No third-party LLM licenses, AWS/Azure hosting fees, or token costs required.
- **Secure RAG:** Advanced Retrieval-Augmented Generation tied exclusively to your data.

Total Cost of Ownership – Komodo AI vs Anthropic Claude

Feature	Claude	Komodo AI
Model	You are a Tenant (Renting intelligence).	You are the Owner (On-premises asset).
Data Security	Data risks leakage if provider is breached.	Zero data leave the building.
Operational Risk	Can be turned off, changed, or updated.	Fully self-contained instance.
Cost Predictability	Subscriptions and strict token limits.	No token limit , no hidden fees.
Blackout Resilience	Requires active internet connection.	Functions during network outages.

Business Cases

- **Labor Reclaimed:** Senior engineers spend roughly 20% of their day answering "how-to" questions. Komodo AI reclaims 1 day per week per engineer. At \$75 an hour, that's \$31,200 in savings per engineer annually.
- **Dramatically Reduced MTTR:** No need to wait for a Subject Matter Expert (SME) to become available during complex outages. Get instant, accurate answers to accelerate Mean Time to Resolution (MTTR).
- **Institutional Knowledge Preservation:** "Clone" your lead architects' expertise. Protect your business from operational gaps as personnel retire by preserving critical knowledge in your local AI vault.
- **Junior Staff Empowerment:** Less-experienced technicians can safely handle advanced configurations and troubleshooting tasks without risking network stability or dragging down escalation tiers.
- **Outage & Compliance Protection:** A single compliance violation or a prolonged network outage can result in fines exceeding \$100,000. Komodo AI acts as an insurance policy against preventable human error.
