WORLD OF COLOURS

Outstanding quality colours and surfaces

COMPOSITES

ADD SOME SPICE

These colors have truly earned unwavering admiration with their unrivalled versatility and remarkable dependability in a diverse array of settings. With an impressive range of vibrant, metallic and solid options at your fingertips, these hues form the bedrock of any successful color scheme.

Vibrant colors can be used to craft a unique appearance that evokes a range of emotions and reactions. Imagine the daring and audacious effect of Lemon, the electrifying and vibrant display of Red, or the mesmerizing and enchanting allure of Intense Blue. In contrast, metallic colors offer a tantalizing array of captivating visual effects that transform under varying lighting conditions and viewing angles, elevating your building to new heights of brilliance and radiance. Solid colors exude a refined and subtle elegance, imbuing your building with a sense of timelessness and sophistication.

These options have been rigorously tested and proven to be a resounding success, leaving a lasting impression on both users and passers-by alike. Rest assured that whether you opt for vibrant, metallic or solid colors, you can bask in the confidence that these colors will leave a significant impact on your building's appearance.

GENERAL INFORMATION

ALUCOLUX® features a multi-coat, multi-bake process on a continuous coil coating line using the highest grade of PVDF/FEVE paint system. The multiple layers are individually cured at temperatures of between 200-260 °C. The quality of the coating is tested according to standards established by E.C.C.A. (European Coil Coating Association) of which 3A Composites is a member. Fluorocarbon (PVDF) coating systems combine good formability and excellent surface durability. They are extremely resistant to weathering, strong solar radiation and pollution. The colour reproduction in this chart is subject to printing limitations. For exact colour matching, request actual colour samples.

The standard gloss for colours is between 30% - 40% according to Gardner Scale.

Minimum order quantities apply.
For more information please refer to your nearest ALUCOLUX® representative or visit www.alucolux.com

ONLY FOR METALLIC COLOURS

To avoid possible reflection variations, it is recommended to install the panels in the same direction as marked on the protective peel-off-foil. Colour variations may occur between panels originating from different production batches. To ensure colour consistency, the total requirement for a project must be placed in one order.
