

Let's make your home shine

Thank you for getting your home camera-ready — it genuinely makes the photos better and keeps shoot day quick and easy. You don't need to stage or move furniture; we handle the composition. A simple clean and declutter, with everything switched on, is perfect. Tick the boxes as you go — your progress saves on this device.

Please leave things where they are

Once it's tidy, please don't shift items from room to room. We photograph each space from **several angles**, so a piece moved between shots can end up looking out of place.

When you'll have your photos

Your media is usually ready within **a couple of business days** of the shoot. We'll email everything as soon as it's ready, so there's no need to check in.
