

Trust your supply chain

Turn disjointed ERP data into vital supply chain intelligence allowing your business to run at the speed of trust.

Hackett Group 50 to Watch
2025–2026

Supply chain risk is now a C-Suite priority

Procurement, sourcing, and trade compliance teams face several obstacles.

1

Supply Chain Risks Are Hidden:

New Tariff Rules and regulations require origin-level traceability. Most companies can't get past Tier 1.

2

Questionnaires Don't Work

65% of suppliers never respond. You're spending months chasing data you can't trust.

3

Most Tools Just Create Noise

(ie more work)
False positives bury real risks—forced labor, sanctions, conflict minerals—in alert fatigue.

4

Your Team Is Stretched Thin

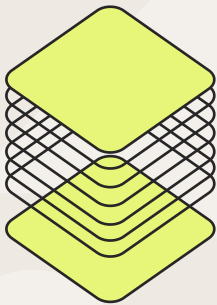

Most responsible sourcing teams are understaffed and under resourced

“FRDM gives us that next-level supply chain visibility that we can’t create organically ourselves except through massive manual efforts.”

— Alec Streeter,
Director of Global
Trade Compliance
Oshkosh
Corporation

We do the work of an entire team for less than the cost of one FTE

Map to Tier 8+

AI discovers sub-suppliers using 4B+ trade records. No supplier outreach required.

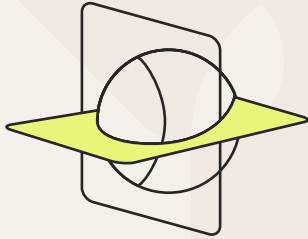

Score Risk

Human rights, ESG, sanctions, geopolitical, cyber scoring from 14+ data sources.

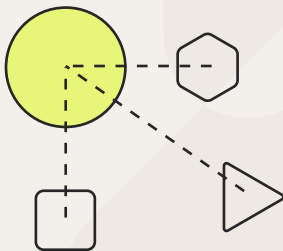

Comply with over 45+ Laws

Pre-built frameworks for UFLPA, CSDDD, LkSG, CBAM, EUDR, PFAS, and more.

Model Trade Scenarios

Forecast tariff impact and simulate disruptions with digital twin technology.

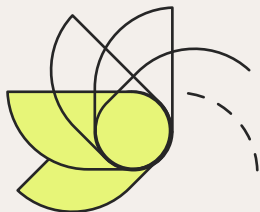

Manage Suppliers

Free portal with insights and a single profile shared across all buyers.

Monitor in Real Time

Continuous alerts on sanctions, regulatory changes, tariffs, and adverse media.

Protect Against Import Bans & Tarriff Requirements

New developments in the US and EU require companies to insure against forced labor anywhere in the supply chain or face import disruption

Proven at scale

FRDM is used by global enterprises, governments, and mid-market companies to manage supply chain risk.

Proximity Analysis

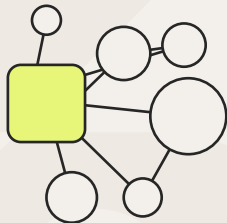

FRDM **evaluates risk depth** through supplier policies, adverse media, sanctions screening, bill of materials, commodity tracing, and trading partner networks.

Immediate ROI

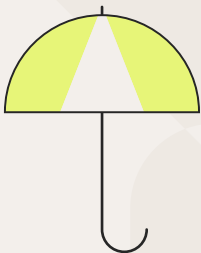

Fewer Hours for Your Team

Autonomous platform replaces questionnaire chasing and consultant engagements. Deploys in weeks and requires hours a month to run.

Fewer Hours for Your Suppliers

No redundant questionnaires. Free portal with a single profile shared across buyers.

Fewer Disruptions To Your Business

Detained shipments, fines up to 5% of revenue, reputational damage
—FRDM identifies risk before crisis.
