

Control, Visibility, & Risk-Management

myMALLORY

myMALLORY is Mallory Alexander's customer-facing digital portal that provides a single platform for managing your shipments with real-time visibility, control, and invaluable insights.

Let Us Solve Your Biggest Challenges

- ✓ Limited visibility across shipments and services
- ✓ Too many emails, portals, and manual updates
- ✓ Difficulty identifying risk and exceptions early
- ✓ Fragmented documentation and reporting

We're your one-stop partner for:

Full insight into
your supply chain
activity

Communication
and documentation
in one place

Proactive alerts
to address issues
before they escalate

Access to everything
you need in one
convenient portal

A Centralized View of Your Supply Chain

myMALLORY connects all activity into a single portal to save you time and eliminate back-and-forth emails. This is how we deliver visibility, control, and insight across air, ocean, domestic, and cross-border shipments.

Intuitive User Interface

We've made your experience faster, simpler, and easier to navigate, helping you get to the screens, tools, and shipment details you need without unnecessary steps.

Visibility and Geo-Mapping

With real-time shipment visibility and geo-mapping, you can see where your freight is as updates happen. Respond faster, identify potential issues earlier, and keep customers and internal teams informed.

Self-Service Tools

Track your shipment, retrieve documents, and manage key tasks without waiting on a phone call or email. And when you need support, the Mallory Alexander team is still right there with you.

Enhanced Reporting and Analytics

Improved reporting and analytics help you understand your shipping patterns, measure performance, identify trends, and make smarter supply chain decisions with better insight.

MalloryGroup.com 

Let's discuss visibility and risk management across your supply chain.
