# SUPERIOR PERFORMANCE

## CGT Alkor PVC Pool Liner Membrane

The industry leader of swimming pool vinyls, CGT provides the best array of swimming pool PVC liners that are defined by its durability, innovation and technology.

The lining system from CGT Alkor is a flexible PVC blanket that is custom-fitted to the walls and floors of the pool structure, providing a 100% watertight enclosure that is cost-effective, long-lasting and easy to maintain.

Engineered for premium performance, the multi-layered structure of the reinforced PVC membrane provides resilience against punctures and tears, abrasive pool chemicals and environmental elements.

Available in an array of plain colours, textures and print designs; CGT Alkor PVC liner membranes can be applied in both competition and recreational swimming pools.

Designed for versatility and ease of installation, CGT Alkor PVC Liner Membranes can be applied over existing surfaces, creating durable, low-maintenance finishes for both pool and pool deck applications.

## Benefits of PVC Liner Membranes

### **Complete Watertightness**

Welding installation creates a secure, seamless barrier that doubles as a leakproof structures and easy to maintain pool wall and floor finish.

### **Durability and Strength**

Comprises two layers of premium PVC film with an internal core of woven polyester mesh reinforcement for optimal resistance against tears and punctures.

### **UV and Fade Resistance**

Advanced protective topcoats and specialised pigment formulations prevent colour fade and sun damage.

### **Design Versatility and Application**

Available in a range of colours, 3D embossed textures and non-slip options to suit various pool designs, for both pool and pool deck applications.

### **Low Maintenance**

Smooth surfaces resists stains, algae growth and chemical wear.

## About Innovez Engineering

Innovez Engineering is a leading design-and-build swimming pool specialist. In 2010, Innovez Engineering completed the largest, elevated stainless steel swimming pool in the world at the Marina Bay Sands Singapore - a 150-metre long infinity pool that spans the top of three hotel towers. Since then, and with almost two decades of experience, Innovez Engineering continues to finetune its focus on delivering top-notch quality, innovation and value to clients.
