

Ecotone House

Ecotone House delivers a high performance, low petroleum house tailored to your needs. We use sustainable design strategies including the Five Principle of Passive House Design to create a highly efficient interior living space that excels in comfort, quality and health.

We simplify the design and construction process by combining standardization with adaptive flexibility offering maximum comfort without excess. Ecotone House's sleek contemporary form, is an elegant, unassuming addition to the natural environment with proportions and materials carefully chosen to blend and balance.
