

# Camissa Protector Fund

## January 2026

Date of issue: 20 February 2026

### Risk/return profile

**Portfolio Manager**  
Dirk van Vlaanderen  
BBusSc, CA(SA), CFA

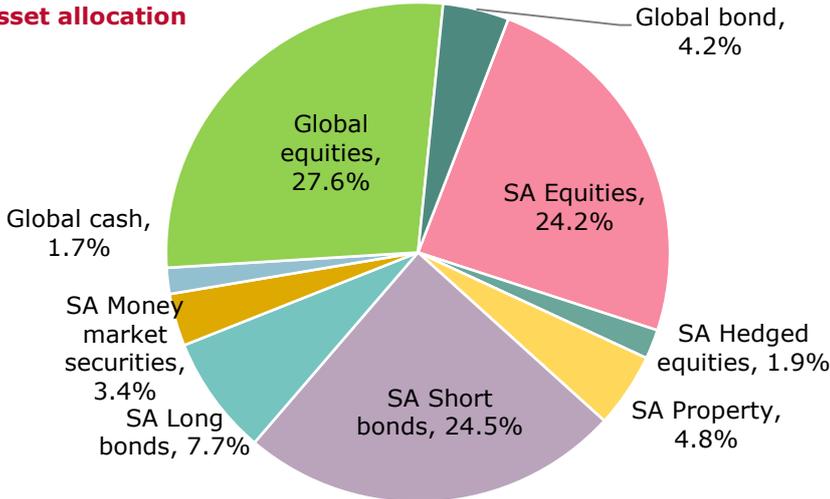

### Fund objective

To provide steady capital growth and returns that are better than equity market returns on a risk-adjusted basis over the medium to longer term.

**This fund is suitable for** investors looking for exposure to the long-term inflation-beating characteristics of equities, with reduced downside exposure and volatility and a strong focus on capital preservation.

This fund is Regulation 28 compliant and can invest in a variety of domestic and international asset classes (such as equities, listed property, conventional bonds, inflation-linked bonds and cash). It is positioned in our team's best investment ideas - which emanate from our bottom-up research process - and is actively managed to reduce volatility and downside risk. Derivative strategies are employed.

### Asset allocation

### Top 10 equity holdings\*

Prosus/Naspers	2.2%	JD.com	1.3%
MTN	1.9%	Datatec	1.3%
JD Sports	1.7%	Omnia	1.2%
Bayer	1.6%	Bytes Technology	1.2%
Brait	1.5%	Glencore	1.2%
		<b>Total</b>	<b>15.1%</b>

\* Top holdings comprise domestic and global equities

<sup>1</sup> TER (total expense ratio) = % of average NAV of portfolio incurred as charges, levies and fees in the management of the portfolio for rolling one and three-year periods to 31 December 2025. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.

<sup>2</sup> TC (transaction costs) are unavoidable costs incurred in administering the financial products offered by Camissa Collective Investments and impact financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. This is also calculated on rolling one and three-year periods to 31 December 2025.

# Highest and lowest monthly fund performance during specified period

$\Phi$  Consecutive months of change in the same direction

\* The Sharpe ratio is used to measure how well the return of an asset compensates the investor for the risk taken. The higher the Sharpe ratio the better the Fund's historical risk-adjusted performance has been. This is calculated by taking the difference between the Fund's annualised return and the risk-free (cash) rate, divided by the standard deviation of the Fund's returns.

<sup>1</sup> Performance is quoted from Morningstar as at month-end for a lump sum investment using Class A Net Asset Value (NAV) prices with income distributions reinvested (income is reinvested on the reinvestment date). NAV refers to the value of the fund's assets less the value of its liabilities, divided by the number of units in issue. Performance figures are quoted after the deduction of all costs incurred within the fund. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All performances are annualised (ie the average annual return over the given time period). Actual annual figures are available on request from Client Service.

<b>Fund size</b>	R543.44 million

**Pricing:** All funds are valued and priced at 15:00 each business day and at 17:00 on the last business day of the month. Forward pricing is used. The deadline for receiving instructions is 14:00 each business day to ensure same day value. Prices are published daily on our website.

The Camissa unit trust fund range is offered by Camissa Collective Investments (RF) Limited [Reg. No. 2010/009289/06], a registered management company in terms of the Collective Investment Schemes Control Act, No 45 of 2002. Camissa Collective Investments is a subsidiary of Camissa Asset Management (Pty) Ltd [a licensed FSP], the investment manager of the unit trust funds and a voting member of the Association for Savings and Investment SA (ASISA).

Unit trusts are generally medium to long-term investments. The value of units will fluctuate and past performance should not be used as a guide for future performance. Camissa does not provide any guarantee either with respect to the capital or the return of the portfolio(s). Foreign securities may be included in the portfolio(s) and may result in potential constraints on liquidity and the repatriation of funds. In addition, macroeconomic, political, foreign exchange, tax and settlement risks may apply. However, our robust investment process takes these factors into account. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Exchange rate movements, where applicable, may affect the value of underlying investments. Different classes of units may apply and are subject to different fees and charges. A schedule of the maximum fees, charges and commissions is available upon request. Commission and incentives may be paid, and if so, would be included in the overall costs. Camissa has the right to close the portfolio to new investors in order to manage it more effectively in accordance with its mandate. Additional information is available free of charge on our website or from Client Service.
