Key Investor Information Document

Camissa Islamic Global Equity Fund

This Key investor information document (KIID) provides you with key information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. Any capitalized terms in this KIID which are not defined in it shall bear the meaning ascribed to same in the prospectus of the ICAV (the "**Prospectus**") and the supplement of the Fund (the "**Supplement**"), both as may be amended from time to time.

Class B USD Shares (ISIN IE0000WPGXB7)
Camissa Islamic Global Equity Fund is a sub-fund of Camissa Global Asset Management ICAV

The fund is managed by **Sanlam Asset Management (Ireland) Limited**

Objectives and Investment Policy

The investment objective of the Fund is to achieve a total portfolio return that is better than the world equity market, over the long term.

The principal focus of the investment policy of the Fund is to invest in Shariah-compliant shares of companies that are listed on Recognised Markets. Up to 35% of the Fund's Net Asset Value ("**NAV**") may be invested in Emerging Markets.

Up to 10% of its NAV may be invested in eligible collective investment schemes.

The Investment Manager, Camissa Asset Management (Pty) Ltd, may, at its discretion invest, directly, up to 10% of the NAV in transferable securities, namely equities or money market instruments which are not listed, traded or dealt in on a Recognised Market.

The Fund may, for defensive or investment purposes, hold up to 80% in cash, Sukuks, other money market instruments and money market funds.

You can subscribe for Shares in the Fund and redeem them on any Business Day before the Dealing Deadline, namely 5.00pm (Irish time), 1 Business Day immediately prior to each Dealing Day.

It is the intention to distribute dividends to Shareholders of this Class and Class A USD Shares only.

The Fund is actively managed by the Investment Manager and measures its performance against the FTSE World Index (the "**Index**") for performance comparison purposes only. While the Fund may invest in the constituents of the Index from time to time, it is actively managed and investments in the portfolio are not specifically selected from the constituents of the Index. Accordingly, the Fund's investment policy will in no way be constrained and the degree of deviation from the Index may be significant.

The Investment Manager will consider ESG criteria in the investment process, alongside other factors. Sustainability Risks are integrated in the investment decision-making and risk monitoring of the Fund to the extent that they represent potential or actual material risks and/or affect opportunities in respect of maximising the Fund's long-term risk-adjusted returns.

Recommended holding term: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years of their initial investment.

For more information about the investment policies and strategies, please refer to the section entitled "Investment Objectives and Policies" in the Supplement.

Risk and reward profile

The Fund is in category 6 as it invests in securities that can vary significantly in price from day to day due to a number of factors. Therefore there is a chance to make large gains but also the risk of suffering large losses.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund. The category is based upon the annual calculation of the Fund's risk calculation relevant to the nature of the types of instruments the Fund invests in.

The risk category shown is not guaranteed and may change over time. The value of the shares may fall and you may not get back the amount you invested.

- Investment risk:** The Fund may not achieve its investment objective and the value of Shares may fall.
- Currency risk:** The Fund invests in assets which are priced in currencies other than the Base Currency (USD). There is a risk of loss to the value of your investment arising from exchange-rate fluctuations.
- Market risk:** The complexity and rapidly changing structure of markets may increase the possibility of market losses.
- Liquidity risk:** There is a risk that adverse market conditions may affect the Fund's ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.
- Unrated securities:** Those may have the characteristics of either investment or sub-investment grade bonds. A lack of rating tends to adversely affect marketability. Unrated bonds may be secured on assets of the issuer. These securities have greater risk of default than higher rated securities.

Shariah performance risk: The performance of a Fund may possibly be lower than other investment funds that do not seek to strictly adhere to the Islamic investment criteria. Compliance with Shariah requirements may place a Fund at a relatively less advantageous position compared to other investment funds that do not have to adhere to the Shariah principles.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Investment Risks" in the Supplement and the section entitled "Investment Risks" the Prospectus.
