Benchmark

Global Equity General funds mean

Fund objective

A Shariah-compliant fund that aims to achieve optimum risk-adjusted total returns by providing investors with exposure to an international collective investment scheme portfolio comprising a diversified mix of global equity and equity-related securities.

Who should consider investing

Muslim investors who are in their wealth accumulation phase, seeking a rand-denominated Shariah-compliant portfolio of international equities. Investors would be able to withstand short-term market fluctuations in pursuit of maximum capital growth over the long-term.

About this fund

This is a feeder fund and will be fully invested in the dollar-denominated Camissa Islamic Global Equity Fund, which invests in a diversified portfolio of international equity securities, subject to the statutory investment limitations. The underlying investments will comply with Shariah requirements as prescribed by the Accounting & Auditing Organisation for Islamic Financial Institutions (AAOIFI) and will not invest in any interest-bearing instruments.

Fees and Fund details

Fees (excl VAT)		Fund details	
Initial fee	0.00%	Fund size	R1.54 billion
Adviser fee	max 3.00%	NAV	208.24 cpu
Ongoing advice fee	max 1.00% pa	ASISA	Global Equity General funds
Management	1.35% pa	Benchmark	Global Equity General funds mean
TER (1y / 3y)	1.79% / 1.80%	Launch date	9 January 2019
TC (1y / 3y)	0.12% / 0.12%	ISIN	ZAE000265831
TIC (1y / 3y)	1.91% / 1.92%	Min lump sum	R5,000
		Min debit	R500 pm

* TER = % of average NAV incurred as charges for rolling 1 and 3-year periods to 30 June 2026. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.
* Transaction Costs (TC) are a necessary cost in administering financial products and impact returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the manager and the TER. Calculated on rolling 1 and 3-year periods to 30 June 2026.

Pricing: All funds valued at 15:00 each business day, 17:00 on last business day of month. Forward pricing. Deadline 14:00 for same-day value. Prices are published daily on www.camissa-am.com and in the national press.

Camissa Collective Investments (RF) Ltd [Reg. No. 2010/009289/06], registered management company per Collective Investment Schemes Control Act No 45 of 2002. Subsidiary of Camissa Asset Management (Pty) Ltd [licensed FSP], voting member of ASISA.

Collective investment schemes are generally medium to long-term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Camissa does not provide any guarantee either with respect to the capital or the return of the portfolio. Where foreign securities are included in a portfolio, potential risks may apply including constraints on liquidity and the repatriation of funds; macroeconomic, political, foreign exchange, tax and settlement risks; and potential limitations on the availability of market information. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units may apply and are subject to different fees and charges. A schedule of fees, charges and maximum commissions is available on request from the manager. Camissa may close portfolios to new investors in order to manage them more efficiently in accordance with the mandate. Additional information, including brochures, application forms and the annual report, is available free of charge on our website or from Client Service.

A feeder fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.

No performance fees are charged on this portfolio.

Sharpe ratio: annualised return less risk-free rate, divided by standard deviation of returns. Higher is better.

Sortino ratio: similar to Sharpe but only penalises downside (harmful) volatility. Higher is better.

Performance is quoted from Morningstar at month-end on a NAV-to-NAV basis for a lump sum investment using Class A Net Asset Value (NAV) prices with income distributions reinvested (income is reinvested on the reinvestment date). NAV refers to the value of the fund's assets less the value of its liabilities, divided by the number of units in issue. Performance figures are quoted after the deduction of all costs incurred within the fund. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All performances are annualised (ie the average annual return over the given time period). Actual annual figures are available on request from Client Service.
