

Critical Loop – CLB-500

Emission-Free, Silent Power

Outfitted with Critical Loop’s custom control systems, **POWR2** can reduce generator run-times in hybrid setups, provide 250kW peak power independent of the grid, peak-shave, and time shift when grid-connected. Camlock connections available for rapid commissioning.

Critical Loop’s custom control systems enable remote monitoring, remote control, and telemetry data.

Features & Benefits

- Reduce generator run-times
- Reduce noise
- Reduce Co2 emissions
- Provide island power
- Stable power quality
